

**Medicare Rates and CPT Codes - Updated February 2018**

**Women's Wellness Connection Clinical Services**

**Reimbursable Services and Procedures for June 30, 2017-June 29, 2018**

Listed below are allowable procedures and the corresponding CPT codes for use in the Women's Wellness Connection Clinical Services program. These rates are based on information found on the Centers for Medicare and Medicaid website, <https://www.cms.gov/apps/physician-fee-schedule/>. Rates are incorporated into the program's Bundled Payment System (BPS) at the beginning of each fiscal year. Codes are provided to show what services are covered through WWC Clinical Services and to aid in negotiating subcontracts. Reimbursement for treatment services is not allowed.

87623	Human Papillomavirus, low-risk types					
<b>END NOTES FOR WWC CLINICAL SERVICES</b>						
1	All consultations should be billed through the standard "new patient" office visit CPT codes 99203 or 99204. Consultations billed as 99204 must meet the CPT coding guidelines for this code. CPT code 99204 is <u>not</u> appropriate for WWC screening visits.					
2	Medicare's methodology for the payment of anesthesia services are outlined in the Medicare Claims Processing Manual, Chapter 12, pages 99-107, available here: <a href="http://www.cms.hhs.gov/manuals/downloads/clm104c12.pdf">http://www.cms.hhs.gov/manuals/downloads/clm104c12.pdf</a> The carrier-specific Medicare anesthesia 2017 conversion rates are available here: <a href="http://www.cms.gov/Center/Provider-Type/Anesthesiologists-Center.html?redirect=/center/anesth.asp">http://www.cms.gov/Center/Provider-Type/Anesthesiologists-Center.html?redirect=/center/anesth.asp</a> . The current rate is \$22.19 (Medicare Base Units = 3).					
3	HPV DNA testing is a reimbursable procedure if used for screening in conjunction with Pap testing or for follow-up of an abnormal Pap result or surveillance as per ASCCP guidelines. It is not reimbursable as a primary screening test for women of all ages or as an adjunctive screening test to the Pap for women under 30 years of age. Providers should specify the high-risk HPV DNA panel only. Reimbursement of screening for low-risk HPV types is not permitted. Cervista HPV HR is reimbursed at the same rate as the Digene Hybrid-Capture 2 HPV DNA Assay. HPV genotyping is allowed.					
4	A LEEP or conization of the cervix, as a diagnostic procedure, may be reimbursed based on ASCCP recommendations. Pre-approval of this procedure for reimbursement is required.					
5	This charge should be used with caution to ensure programs do not reimburse for supplies, the cost of which, has already been accounted for in another clinical charge.					
6	Breast MRI can be reimbursed in conjunction with a mammogram when a client has a BRCA gene mutation, a first-degree relative who is a BRCA carrier, or a lifetime risk of 20-25% or greater as defined by risk assessment models such as BRCAPRO that are largely dependent on family history. Breast MRI can also be used to better assess areas of concern on a mammogram or for evaluation of a client with a past history of breast cancer after completing treatment. Breast MRI should never be performed alone as a breast cancer screening tool. Breast MRI cannot be reimbursed to assess the extent of disease in a women who has just been diagnosed with breast cancer.					
7	Codes 19081-19086 are to be used for breast biopsies that include image guidance, placement of localization device, and imaging of specimen. These codes should not be used in conjunction with 19281-19288.					
8	Codes 19281-19288 are for image guidance placement of localization device without image-guided biopsy. These codes should not be used in conjunction with 19081-19086.					
9	These procedures may be reimbursed at their own Medicare rates. They no longer have to be reimbursed at the 88142 rate.					

WWC CLINICAL SERVICES FY2018 CPT CODE LIST

10	For a bilateral breast ultrasound, a modifier 50 should be added to either 76641 or 76642 to indicate a bilateral procedure. The Medicare Physician Fee Schedule assigns a "1" bilateral indicator to both CPT codes 76641 and 76642 which means that Medicare will allow 150 percent of the standard reimbursement rate. There should not be two CPT codes billed if a bilateral ultrasound exam is needed.
