

CAGE/WIRELESS HANDHELD VALIDATION UNIT CHECKLIST

Casino:	
Cage or Wireless Handheld Unit:	
Unit Number:	
Completed by:(print all names)	

This checklist is to be used for each validation unit in the cage or wireless handheld. This checklist must be completed and pass the requirements outlined below. Any individuals who complete all or any portion of the checklist must sign the document. This checklist must be maintained at the casino and made available to the Division of Gaming upon request. If any of the following fail, document your findings and indicate the next course of action.

CAGE

PASS FAIL (initial on line to indicate test results)

- _____ _____ Each cashier using a validation unit has their own login or password to ensure each cashier redeems tickets under their login

- _____ _____ Manually enter or scan a valid ticket. The validation unit should have a valid ticket message.

- _____ _____ Manually enter or scan a redeemed ticket. The validation unit should indicate a non-valid ticket message.

- _____ _____ Manually enter or scan an expired ticket. The validation unit should indicate a non-valid ticket or expired ticket message.

- _____ _____ If testing a wireless handheld validation unit a ticket cannot be validated outside of the licensed premises (e.g., outside of building, or at another casino including casinos with common ownership).
