

OeHI

Office of eHealth Innovation

Dear valued stakeholder,

The Colorado Governor's Office of eHealth Innovation and the Colorado eHealth Commission will be conducting a series of focus groups related to the availability of health information tools and services.

We are seeking Colorado residents who manage their own health or directly assist in the management of the health of others. Individuals from all areas of Colorado, all age groups (over 18), all occupations, and all income levels are being invited to attend these focus group sessions. In addition to individuals who manage their own or other family members health, individuals employed as care coordinators in for profit or non-profit organizations are also sought.

The purpose of the focus groups is to gain insight into, and understanding of, Coloradans' perspectives on:

- The availability of consumer health information tools and services today
- The kinds of health information tools and services you would like to be available to help you be more knowledgeable, proactive, and engaged in your and/or your loved one's health and well-being
- The issues and barriers to access to health information
- Receive suggestions/ideas to help address the identified barriers

The focus group sessions will be facilitated by Mosaica Partners, the health information strategy consultants that helped develop Colorado's Health IT Roadmap. The sessions will be 2½ hours long and will be held at various locations around Colorado in January, February, and March this year.

If you would be interested in attending one of these focus groups, or would like to nominate someone else to attend, please respond to: Carrie Paykoc, Interim Director, Office of eHealth Innovation, carrie.paykoc@state.co.us.

Thank you,

Carrie Paykoc
Interim Director, Office of eHealth Innovation
