What will happen with paychecks due to be paid on July 1, 2014?

The scope of the CORE Project does not currently include replacement of the State's payroll system. Payment of paychecks due on July 1, 2014, will not be impacted by the CORE implementation.

Will there be one requisition workflow that all State agencies will follow?

One of the goals of the CORE Project is to optimize the use of standardized processes, including a requisition workflow model that will be used by all State departments. The project team will work with the State departments to accomplish this goal.

How do we provide input in a specific functional area if our department does not have a representative on that functional team?

There is much work to be done to successfully complete the implementation of CORE. If you are interested in joining one of the functional teams to assist with writing of policies and procedures, testing or training other system users, please reach out to the project team. If you are unable to be on the team, but have input on one or more specific areas, you may also provide that information directly to the Functional Team Lead for that area. Contact the Functional Team Lead for your area of interest (listed on the Contact Us page of the [CORE Project website](#)) or contact Bob Jaros at bob.jaros@state.co.us.

Will CORE support document attachments?

CORE will support electronic document attachments. The State will implement an Enterprise Content Management (ECM) solution together with CORE. File attachments will not be limited in size and will support the elimination of paper files.
