

How do I know which of these systems to use: Colorado Immunization Information System (CIIS), CO.TRAIN, or the CIIS Resource Center (CRC)?

The CIIS program uses three web-based sites that offer services to new and existing CIIS users. Below is a description of the services that are available on each website:

CIIS Main Application is where users can access the Colorado database of patient immunization records.

- Health care providers can use CIIS at <https://ciis.state.co.us/ciis/Login.aspx> to check the immunization status of patients, review recommended immunizations and manage their vaccine inventory.
- Schools/ Childcare/ Head Start Programs can use CIIS at <https://ciis.state.co.us/school/Login.aspx> to check the immunization status of students, review recommended immunizations and print immunization records for improved record keeping.

Please Note: You must first complete the required online training course(s) and then submit a CIIS user account request form in order to gain access to CIIS. To request a CIIS account, click on the *CIIS General User Request Form* link from the [CIIS Main Application Login](#) screen to begin the process.

The screenshot shows the login interface for the Colorado Immunization Information System (CIIS). At the top, there is a circular logo with the text "COLORADO IMMUNIZATION INFORMATION SYSTEM" and "CIIS" in the center. Below the logo, the text "Colorado Immunization Information System" is displayed. The main heading is "Main Application". Underneath, there is a "Login" section with two input fields: "Username" and "Password". A "Forgot Password?" link is located below the Username field. A blue "Login" button is positioned to the right of the Password field. Below the login fields, there is a "Trouble Logging in?" link. At the bottom, contact information is provided: "CIIS User Support: (888) 611-9918 Fax: (303) 758-3640", "CIIS General Mailbox: CDPHE.CIIS@state.co.us", and "[CIIS General User Login Request Form](#)". The footer features the Colorado Department of Public Health & Environment logo, which includes the letters "CO" and "CDPHE" next to a stylized mountain and sun icon.

CO.TRAIN (www.co.train.org) is used to access the CIIS online training courses, which are required for new CIIS users who work in a healthcare or school setting. New CIIS users will need to [create an account on CO.TRAIN](#) in order to register for the CIIS online training courses and print course certificates of completion. **Please Note:** This account is **NOT** your CIIS user account.

CIIS Resource Center (CRC) (<https://www.ciisresources.com/emrlogin.asp>) is a self-service system that allows you to do the following:

- Enroll your organization for participation in CIIS.
- Submit new user account requests.
- Access CIIS training information and resources.
- Provide access to electronic data exchange guidelines and CIIS messaging specifications.
- Test Health Level 7 (HL7) messages generated from your EHR against CIIS specifications for formatting accuracy (HL7 validation).
- Receive assistance with Stage 1 Meaningful Use attestation for the immunization registry reporting objective.
- Register your intent for Stage 2 Meaningful Use.
- Submit online support tickets to the CIIS Help Desk.
