

Instructions for Removing the DHD Field Client

1. From the Control Panel, uninstall:
 - a. All SQL elements;
 - b. Railo; and
 - c. LocalDHD
2. Once the system restarts, navigate to C: and remove:
 - a. The DHD folder;
 - b. The railo folder; and
 - c. If you don't see them under C:, then check in C:\Program Files AND C:\Program Files (x86) and remove them from one or both.
3. Run a registry clean up tool, such as cCleaner.
