

Individuals Clinically Recommended for Transition to a Community Provider

Description of Trend:

The percent of individuals who have been successfully transitioned from the DRCO has decreased 1.9% from the previous month.

Numerator: Number of individuals by transition process step (awaiting guardian engagement; referral packets remaining to be sent; referral packets sent; awaiting provider interest; provider available; facilitated by CO Choice Transitions program; on hold for external reasons; successfully transitioned)

Denominator: Number of individuals who are ready for transition from the Regional Centers
