

# Individuals Clinically Recommended for Transition to a Community Provider

## Description of Trend:

The percent of individuals who have been successfully transitioned from the DRCO has increased 1.1% from the previous month.

**Numerator:** Number of individuals by transition process step (awaiting guardian engagement; referral packets remaining to be sent; referral packets sent; awaiting provider interest; provider available; facilitated by CO Choice Transitions program; on hold for external reasons; successfully transitioned)

**Denominator:** Number of individuals who are ready for transition from the Regional Centers
