Governor's Energy Office

The Governor's Energy Office recognizes the role of biofuels, along with hybrid vehicle technologies, improved mass transit and more efficient vehicles in reducing our oil dependency. To learn more about the Governor's Energy Office and biofuels, please visit www.colorado.gov/energy

The Governor's Biofuels Coalition aims to educate Colorado's almost 300,000 vehicle owners to the benefits and availability of E85 and biodiesel. Also, the GBC aims to maximize the number of installations of E85 and biodiesel pumping facilities within Colorado by granting funds for equipment and educational/learning materials.

If you are a station owner, fleet manager, or community member interested in bringing biofuels to your area, please contact stacey.simms@state.co.us for information on grants and technical support.

Funding for the Governor's Biofuels Coalition was awarded by the Department of Energy's *Maximizing Alternative Fuels Grant* and the Colorado Clean Energy Fund.

Printed March 2009.

For an updated list of stations, please visit www.eere.energy.gov/afdc/fuels/stations_locator.html or contact the Governor's Energy Office.

Biofuels

Good for your vehicle
Good for our environment
Good for Colorado

Thanks to the dedication of retail station owners in communities throughout Colorado, more than 120 stations are now selling E85 and Biodiesel. With support from the Governor's Biofuels Coalition, Colorado Corn and the Department of Energy, these stations are selling millions of gallons of domestic fuels that are cleaner burning and good for Colorado's economy.

* = E85; ● = Biodiesel
