Colorado State EMS Conference November 5—8, 2009

Dear Conference Participant,

Welcome to the 2009 Colorado State EMS Conference!

This year's conference promises to be one of the best ever with over 60 presentations to choose from. Our premier EMS educators from within Colorado and across the nation will present a diverse variety of courses and share with you the latest information and innovations in emergency care.

The 2009 Conference truly combines *Education* and *Motivation* to produce a very *Successful* conference and learning experience.

To help you plan and document your learning experience, we have provided you with a recommended allocation of continuing education credits for each presentation. Each matrix indicates the recommended credits based on both Colorado and National Registry recertification categories. Please remember these are only recommendations, and continuing education hours may be appropriately allocated in more than one way. This information should be provided to your Colorado State-Recognized EMS Training Center/Group that will approve the credits for your individual recertification application.

For more information regarding the Colorado state re-certification process, please visit our web site at **www.coems.info**. For information about National Registry, please visit their web site at **www.nremt.org**.

We hope you enjoy your time at Colorado's foremost EMS education event at the beautiful Keystone Resort and Conference Center.
