2011 Colorado State EMS Conference CE Guide

2011 Colorado State EMS Conference November 3 - 6, 2011

Keystone, Co

This year's conference offers over 60 presentations which may be used for National Registry and/or Colorado EMS Provider recertification. To help you plan and document your learning experience, we have provided you with a recommended allocation of continuing education credits for each presentation. Each presentation matrix indicates the recommended credits based on both National Registry and Colorado recertification requirements. Please remember these are only **recommendations**, and continuing education hours may be appropriately allocated in more than one way. This information should be provided to your local State-Recognized EMS Education Program representative who will approve the credits for your individual recertification application.

For more information regarding the Colorado state recertification process, please visit our web site at www.coems.info.

For more information about National Registry, please visit their web site at www.nremt.org.
