

An Indispensable Health Care resource to the communities we serve.....

ICHP Well Child Check/HEDIS Gap Project

- ▶ This project is a result of ICHP and CHP Quality staff discussing the challenges around Well Child Checks (for the RCCO) and EPSDT Screenings (for the BHO).
- ▶ The Well Child Check KPI specifies ages 3–9, however the BHO requirement includes children ages 0–21, so the project will encompass the greater age range to cover both groups.
- ▶ The project plan is for the Health Solutions Care Coordinators to leverage the therapeutic relationship between the patient/family and the behavioral health practitioner to engage those who receive BH services and need a WCC check or other preventative health care visit with their PCP. We anticipate a smooth implementation as the Care Coordinators and behavioral health staff work for the same entity.

Current Healthy Community Efforts

- ▶ Chaffee County
- ▶ Pueblo County
- ▶ Tools/resources
- ▶ Data sharing
- ▶ Strategic Plans
- ▶ Working on aligning screening efforts with data and referrals
