|  | \$16.33                     | \$139.24             | \$29.07                          | \$21.12                        | \$61.48      | \$21.59           | \$183.12      |

<sup>1</sup> Breast and Cervical Cancer Program participants share a capitation rate with the remainder of the Adult population, and comprise less than 1% of that total population. As such, a forecast for BCCP program eligibles was not performed.

<sup>2</sup> Adjustment factors for FY 2015-16 Q1 and Q2 represent actual experience for time period. All future years use FY 2014-15 data.

<sup>3</sup> The rate set for Q3 and Q4 of FY 2016-17 will be the same rate in effect for Q1 and Q2 of FY 2017-18 due to reverting back to a calendar year rate setting cycle.

<sup>4</sup> The final adjustment factor is derived by adding 1 to each individual adjustment, multiplying the result, and subtracting 1 from the product.

<sup>5</sup> The number presented, here, reflects the final outcome of payment of partial capitations and the estimate of full IBNR based on that component of IBNR runout that has been completed. Because the IBNR component is estimated, this final figure is estimated and may change in future exhibits.
