Flexible or Temporary Staffing

- Flexible Staffing is a strategy that allows companies to turn a portion of their labor expenses from a fixed cost to a variable cost which helps improve both profitability and efficiency. It increases an employer's ability to acquire talent very quickly and enables companies to be more streamlined and responsive to market conditions.
- **Cost Savings** - Depending on your clients' changing demands on their businesses, industries, or customers, employers can have the flexibility to bring on workers only when they really need the extra help. **So they're paying for the workforce they need, when they need it.** Employers experience immediate cost savings because we take on the cost burden of workers' compensation and employment-related taxes while minimizing high overtime costs by extending employers core employees' working hours. This helps the client minimize their fixed costs.
