¹ Breast and Cervical Cancer Program participants share a capitation rate with the remainder of the Adult population, and comprise less than 1% of that total population. As such, a separate analysis was not performed.

² The Weighted Mental Health Total is the weighted capitation rate distributed by Behavioral Health Organization (BHO) across each eligibility category based on the total number of claims processed (i.e. Elderly clients age 65 and over make up a percentage of all client claims, and each BHO services some subset of the total number of claims for Elderly clients).

³ The Department paid at a rate 3% higher than the actuarial midpoint for Q3 and Q4; the rate presented is the average of the Q1 and Q2 and the actuarial midpoint (not the paid rate) of Q3 and Q4 as weighted by claims percentages.

⁴ The Department paid at a rate 2.5% lower than the actuarial midpoint for September through December and 2.5% lower for three BHOs for Q3 and Q4; the rate presented is the average of the actuarial midpoint (not the paid rate) of Q1 and Q2 and the actuarial midpoint (not the paid rate) of Q3 and Q4 as weighted by claims percentages.

⁵ The Department paid at a rate 2.5% lower than the actuarial midpoint for three BHOs for Q1 and Q2 of FY 2010-11 and at a rate 1.71% lower than the actuarial point estimate for all five BHOs for Q3 and Q4 of FY 2010-11; the rate presented is the average of the actuarial midpoint (not the paid rate) of Q1 and Q2 and the actuarial point estimate (not the paid rate) of Q3 and Q4 as weighted by claims percentages.

⁶ The weighted rate is derived by distributing the individual rates across the estimated proportion of caseload seen under the respective half years the two rates are in effect.
