Subject: Four Corners Pre-cast Septic Tank - Acceptance
For Use in Colorado On-site Wastewater Treatment Systems

Dear Mr. Thompson:

Pursuant to section 43.13 of the On-site Wastewater Treatment System Regulation 5 CCR 1002-43 (Regulation 43), the Water Quality Control Division (Division) has reviewed drawings and specifications received February 9, 2015 and March 3, 2015, for the following septic tanks:

- 1,000 gallon, double compartment
- 1,000 gallon, double compartment, low profile,
- 1,250 gallon, double compartment
- 1,500 gallon, double compartment
- 1,500 gallon, three compartment, lift station
- 1,500 gallon, three compartment, dosing siphon
- 2,000 gallon, double compartment, traffic rated

The Division finds the tank design to be consistent with the criteria of section 43.9 of Regulation 43. The Division also provides this acceptance of the tank(s) referenced above as meeting these criteria and acceptable for use in Colorado.

The materials reviewed included evidence that all of your tanks are nationally certified as you are a manufacturer that participates in the Plant Certification Program of the National Precast Concrete Association (NPCA) so watertightness testing is not required pursuant to section 43.13(G)(2). However, please provide a copy of your re-certification on an annual basis in February of each calendar year.

This acceptance does not constitute an endorsement of this product. As individual local public health agency regulations may be more stringent than Regulation 43, the Division cannot ensure the acceptance of a septic tank within any given jurisdiction.

If you have any questions regarding the Division's review or findings, please contact me at (303) 692-2366 or chuck.cousino@state.co.us.

Sincerely,

Charles J. Cousino, REHS
On-site Wastewater Treatment System Coordinator
