

We Can Help Answer Questions Like These...

- Are any of the wastes I generate hazardous wastes?
- How should I label containers of hazardous waste?
- How should I store my hazardous wastes?
- What hazardous waste training do my employees need?
- What are the regulatory requirements for emergency response?
- What kinds of records am I required to keep for hazardous wastes?

The Generator Assistance Program (GAP) offers free, on-site assistance with hazardous waste and other environmental regulations.

We can answer your tough questions... and our services are free.

Welcome to the Generator Assistance Program (GAP)

Confused over Hazardous Waste Regulations? We can help!

We offer free assistance to small businesses seeking help in interpreting and complying with hazardous waste and other environmental regulations.

Our staff knows the compliance process and understands how the latest legislative and regulatory changes affect the management of your hazardous waste.

We Provide 3 Major Services:

1 **On-site assistance** in understanding and implementing the hazardous waste regulations and other environmental regulations.

2 **Tools** that make hazardous waste compliance easier for you.

3 **Advice** on pollution prevention and waste minimization alternatives that may save you money.

*A GAP site visit will not result in any enforcement action.**

The Generator Assistance Program (GAP) is designed to help you comply with environmental regulations. Our staff can help explain and sort through the complex hazardous waste and other environmental regulations that apply to your business. GAP will help you identify and correct on-site problems without the threat of an enforcement action.

*The only exception is if your facility is currently causing imminent and substantial endangerment to public health or the environment through mismanagement of hazardous wastes.

We understand the challenges that small businesses face. GAP is designed to support the business community by providing assistance before there is an enforcement problem.

We provide the service you need, when you need it, and at your facility. This service is **free**.

For more information or to schedule a GAP site visit, call the GAP Coordinator at 1-888-569-1831 x3415 or 303-692-3415.

- We will contact you right away!
- If you only have one or two questions and do not want or need an on-site visit, please call our Technical Assistance Line at 303-692-3320 or 1-888-569-1831 x3320 or explore our website (listed below).
- For assistance focused on air pollution regulations, help is available through the Small Business Assistance Program (SBAP), within the Air Pollution Control Division. For more information about the air assistance program, call 303-692-3175 or 303-692-3148.
- For Pollution Prevention assistance and for Energy Efficiency Audits, call 303-692-2977.
- For Environmental Leadership information call 303-692-3477.
- Check out our website for guidance documents and more detailed information on the Generator Assistance Program (GAP).
