

High School Graduation Rates

Measure Description

The percentage of students receiving a regular diploma within four years of entering the 9th grade.

Evaluation Period

By school calendar year

Numerator

The number of students receiving a diploma within 4 years of entering 9th grade.

Denominator

The number of students entering from 9th grade plus the number of transfers into a district minus the number of verified transfers out.

Notes

- HCPF will report this measure using the data from the Colorado Department of Education. The Specifics of the measure calculation can be found [here](#).
- Previous year's data becomes publicly available each January.
- This measure also includes students who completed 8th grade but never began 9th grade.
