

Homemade Trailers

In cases where a private party has built a trailer, it is necessary to apply for a homemade ID number. The builder must supply our office with the following information: length, width, weight, value, and type of trailer. If parts or supplies were purchased to build the trailer, bills of sale are also required. The builder will be required to have a certified inspection completed along with a **DR 2697**.

Upon completion of the application, we will assign an ID number which the owner must have affixed to the metal frame of the trailer. **The fee for the ID number is \$3.50.** Other title and licensing fees may also be applicable.
