New ICD-9-CM Diagnosis and Procedure Codes Crosswalk for October 1, 2007

To reimburse inpatient hospital claims, the Department uses the DRG system methodology. The current DRG table with respective weights, ALOS and trim point is the same used since October 1, 2006. Please refer to the October 1, 2006 table under the "DRG Relative Weights" link.

Effective January 8, 2008, the Medicaid DRG system has been updated with new ICD-9-CM diagnosis and procedure codes which were not part of the original Version 24.0 DRG. The new codes were cross walked to the most appropriate preexisting code, allowing the system to group accordingly. The following table contains new ICD-9-CM codes which were not part of the original Version 24.0 DRG.
