INDUSTRY-WIDE BULLETIN: 14-05

**RE: IMPORTANT INFORMATION FROM THE MARIJUANA ENFORCEMENT DIVISION
REGARDING APPROVED TESTING FACILITIES**

Dear Colorado Marijuana Industry Members,

**Industry Bulletin re: List of Approved Laboratories for State-Mandated Testing of Retail
Marijuana Products**

As of this date, the Marijuana Enforcement Division (MED) and the Colorado Department of Public Health & Environment (CDPHE) have provisionally certified three laboratories for accepting and processing samples in accordance with state-mandated testing. These laboratories are:

- CannLabs, LLC
- CMT Laboratories, LLC
- Gobi Analytical

Moving forward, MED will maintain a document on our website (www.colorado.gov/revenue/med), posted on the News and Information Page, that will provide current information on the testing facilities certified to conduct state-mandated potency, homogeneity and contaminant testing. As more laboratories become certified for accepting and processing state-mandated testing samples, their information will be added to the list. Please regularly check our website for the most current list.

Regards,

Lewis Koski
Director, Marijuana Enforcement Division
