Mr. David Lentz, P.E., Regulatory Director
Infiltrator Water Technologies, LLC
4 Business Park Rd.,
P.O. Box 768
Old Saybrook, CT 06475

Subject: IM Series; Septic Tank Acceptance; Re-issuance
For Use in Colorado On-site Wastewater Treatment Systems

Dear Mr. Lentz:

As requested by Mr. Dick Bachelder, Senior Regulatory Specialist for Infiltrator Water Technologies, LLC, the Water Quality Control Division (Division) is providing a re-issuance of the August 29, 2014 acceptance letter for the IM series of septic tanks noted below to update the revised legal name of the company to: Infiltrator Water Technologies, LLC.

Pursuant to section 43.13 of the On-site Wastewater Treatment System Regulation 5 CCR 1002-43 (Regulation 43), the Water Quality Control Division (Division) has reviewed drawings and specifications received August 12, 2014 for the following septic tank(s):

- Model: IM-540; as a single-compartment septic tank that must be used in series with another larger tank so as to comply with all requirements of section 43.9(B)(4)(a) through (i) of Regulation 43. Only one access opening is provided on this tank.
- Model: IM-1060; as a single-compartment septic tank that must be used in series with another tank so as to comply with all requirements of section 43.9(B)(4)(a) of Regulation 43. Two access openings are provided on this tank.
- Model: IM-1060; double-compartment septic tank. Two access openings are provided on this tank.
- Model: IM-1530; as a single-compartment septic tank that must be used in series with another tank so as to comply with all requirements of section 43.9(B)(4)(a) of Regulation 43. For tanks with both two and three access openings.
- Model: IM-1530; double-compartment septic tank. For tanks with both two and three access openings.

The Division finds the tank design to be consistent with the criteria of section 43.9 of Regulation 43. The Division also provides this acceptance of the tank(s) referenced above as meeting these criteria and acceptable for use in Colorado.

The materials reviewed included evidence that ***the tanks are certified for use as a septic tank by the International Association of Plumbing and Mechanical Officials (IAPMO) so watertightness testing is not required pursuant to section 43.13(G)(2). However, please provide a copy of your current IAPMO certification to the Division on an annual basis.

This acceptance does not constitute an endorsement of this product. As individual local public health agency regulations may be more stringent than Regulation 43, the Division cannot ensure the acceptance of a septic tank within any given jurisdiction.

If you have any questions regarding the Division's review or findings, please contact me at (303) 692-2366 or chuck.cousino@state.co.us.

Sincerely,

Charles J. Cousino, REHS
