The calculation is based on the difference between the employee only and the employee plus child rates.

For after-tax elections, the taxable amount is the difference of the state shares. For pre-tax elections, the taxable amount is the difference of the total rates. The NTD amount for employees with pre-tax deductions is higher because the employee should not receive a tax benefit for covering a non-tax dependent. The higher NTD amount removes the tax benefit the employee derives from his/her pre-tax payroll deduction.

The NTD amount should only be entered for the plan(s) that the non-tax dependent has coverage for (ex: do not enter NTD for dental if the non-tax dependent only has medical coverage). If the non-tax dependent has coverage for both medical and dental plans, then the amounts should be added together.
