Subject: Norwesco Inc. and Snyder Industries, Septic Tank Acceptance
For Use in Colorado On-site Wastewater Treatment Systems

Dear Mr. Bolzer :

Pursuant to section 43.13 of the On-site Wastewater Treatment System Regulation 5 CCR 1002-43 (Regulation 43), the Water Quality Control Division (Division) has reviewed drawings and specifications received June 19, 2014 and July 2, 2014, for the following septic tanks:

- 750 gal., low profile, double compartment
- 1000 gal., low profile, double compartment
- 1250 gal., low profile, double compartment
- 1500 gal., low profile, double compartment

The Division finds the tank design to be consistent with the criteria of section 43.9 of Regulation 43. The Division also provides this acceptance of the tank(s) referenced above as meeting these criteria and acceptable for use in Colorado.

Note: The materials reviewed included evidence that each of the tanks are certified for use as a septic tank by the International Association of Plumbing and Mechanical Officials (IAPMO), so watertightness testing is not required pursuant to section 43.13(G)(2). However, proof of current IAPMO certification must be submitted to the Division whenever the prior certification expires.

This acceptance does not constitute an endorsement of this product. As individual local public health agency regulations may be more stringent than Regulation 43, the Division cannot ensure the acceptance of a septic tank within any given jurisdiction.
