

Explanation: This list identifies industrial and municipal wastewater treatment facilities required to evaluate potential future nutrient (phosphorus and nitrogen) discharge reductions. Inclusion on the list is primarily a function of Capacity to Use (discharge volume) and Watershed Priority (current/future impacts). Permits not renewed are administratively continued. Actual treatment improvements can not be determined until facility-specific engineering analyses are completed.

PERMIT	Permittee	Facility name	Permit Exp date	Permit Status	Capacity to Use, MGD	Watershed Priority	Permit Type	Justification	Special condition
CO0000005	Lower Fountain Metro Sewage Disposal District	Harold D Thompson Regional WRF	6/30/2018	effective	2.5	High	Domestic	NEW, >2 MGD
