

**Pacific Feature Steering Committee Report – May 2014**

**Location and Date**-----

CI Conference Room  
Thursday, May 15, 2014  
2:00 pm – 4:00 pm MDT

Due to the Pacific Pilot Migrations taking place during April and May, a large number of feature requests and bugs have been submitted to the team. This focus on short-cycle bug-fix and incident management work means that the team has not been able to focus on items planned for research, and priorities have shifted. To make this report more straightforward, we have removed estimated timeframes and epic categorization. Instead, we have sorted items strictly by the workflow state they are currently in. The next Semi-Annual Feature Release for the Pacific Platform is planned to go into production during September 2014.

In an effort to accurately represent the work the team is focusing on, we have included bug-fixes in this list as well as requested features. **Bugs are listed in Red.**

Status	Definition
Declined	Committee has declined request
In Development	Currently being developed
In Research	Currently being researched
Feedback	Requires additional feedback from requestor
Planned for Development	Committee has requested feature to be developed
Duplicate	Duplicate of existing request
In Production	Published to production

PAC-#	Description	Status – April 2014	Status - May 2014
2	SOLR Search cannot search documents larger than 10MB		Duplicate
7	Left Navigation Menu Accordion		Duplicate
12	Implement way to toggle unauthenticated user access to site nodes	N/A	In Research
13	Integrate Continuous Integration Testing Platform	In Development	In Development
26	Recreate Fatwire Environment within current Pacific Organic Group Structure	Duplicate	Duplicate
29	Integrate File Insert Module	In Development	In Research
30	Integrate Media Module	In Development	In Research
35	Add Video Field To Page Nodes	In Research	In Research
36	Define Disk Allocation Limits for Groups and Users	In Development	In Research
37	Define allowed HTML for content body nodes	In Research	In Research
40	Setup environment variable for Private File System Path	In Development	In Development
47	Implement Content Workflow Process Within OG	Feedback	In Research
48	Implement Dual Authentication Protocol For Admin Users	In Research	In Research
49	Implement Blog Commenting Functionality	In Research	In Research
50	Implement a "Most Popular" Dynamic View	In Research	In Research
51	Add Publish Date to News Item Display	In Development	In Research
52	Make Photo Slider View Subtext Display Optional	In Research	In Research

53	Add RSS Feed Functionality To Latest News View	In Development	Planned for Development
55	Implement Production Repository Management System	In Development	In Production
58	Implement a more configurable Google Analytics OG Integration	In Research	In Research
60	Document and Define Nodequeue Feature	In Research	N/A
63	Enable Advanced Templates on Nodes	In Research	In Research
65	Improve Node Linking Functionality	In Research	In Research
66	Implement Block Sliders For Nodes	In Research	In Research
73	Establish Public Testing Realm	In Development	In Development
75	As a Minisite Admin, I want to be able to determine which groups will return search results on each of my groups	In Development	In Research
83	Optimize Acquia Dev And Staging Environments		In Development
85	Implement Block Themes Module	In Research	In Research
86	As an MSA user, I want to be able to create and manage multiple calendars within the same group	In Research	In Research
87	As an MSA user, I want to be able to mark certain content and files as restricted so that only authenticated users can access them	Feedback	In Research
88	As an authenticated user, I would like to be able to create event nodes with recurring dates	In Research	In Research
89	As an MSA, I want to create a custom taxonomy dictionary that content creators can use to classify content	In Development	In Production
91	As a Content Creator, I want to classify content according to a custom dictionary for my group	In Development	In Production
92	As an unauthenticated user, I want to view content grouped by taxonomy in dynamically generated view	In Development	In Production
93	Implement Mandatory Capcha Field for Unauthenticated User Webforms		In Research
96	As an Admin, I need to make a single group inaccessible to users, then re-enable accessibility unauthenticated	In Research	Duplicate
97	Create Pop-up for Security Agreement when provisioning new Content Managers	In Research	Planned for Development
98	Add the ability to include a custom style sheet in the global header	Declined	Declined
99	Allow banner images to be configurable, clickable links	In Research	Planned for Development
100	Make Easy Social Icons Optional	In Research	Planned for Development
101	Implement a State Online services block on the minisite homepage template	In Research	In Research
103	Implement Environment Indication		Planned for Development
106	When using the <nolink> tag in menu links, the menu styling for the item is broken		In Development
107	Banner and Slider Nodes do not have an Alt Text field		In Development
108	Jump To Navigation on Pacific pages is not group sensitive		In Development
110	Plus Sign on Collapsible Text Boxes Should Be Clickable		Planned for Development
117	Implement Automatic Log-Out Solution		Planned for Development
118	URL Aliases Are Not Group Sensitive		In Development
119	Provide multiple users access to webform results		In Research
120	The CS Patrol and E3 Modules Are Preventing Organic Group Functionality		In Development
121	Allow footer area nodes to be editable with a WYSIWYG		Feedback
122	Implement ability to call classes for styling buttons		Feedback
123	Implement File Management Library Solution		Duplicate
124	Allow for updated versions of files to be uploaded while maintaining the same URL		Duplicate
125	Implement Organic Group Sensitive Sitemapping Solution		Feedback
126	Allow Top Navigation Links To Line Break		In Research
127	Implement non-contextual side-navigation menu that can be customized		In Research

128	Allow top navigation menu to be specified as sticky for specific content nodes	In Research
129	Allow top navigation to be turned on or off without disabling side navigation or breadcrumbs on nodes	In Research
130	Implement a dynamic "most-visited pages" page block that could be placed on the homepage or any sub-page	In Research
131	Allow MSA users to create sub-folders within the image upload interface	In Research
132	Enable Relative Path Linking to existing nodes within WYSIWYG	Feedback
133	Allow menus to show active state when viewing content	In Development
134	Integrate A File Update Solution for Pages	Duplicate
135	Implement solution to lock content during edit so that multiple users cannot attempt changes at the same time	In Research
136	Categories Taxonomy View - The term weight field has no effect	In Development
139	Categories Taxonomic View - Change View Order	Planned for Development
140	Categories Taxonomic View - Integrate Draggable Views for Related Content	Planned for Development
142	Contextual Left Navigation Menu does not function after two levels due to the auto-collapse setting	In Development
143	Files Removed from Content are still accessible	In Development
146	MSA users can edit some details of accounts outside of their group	In Development
149	Implement a File Management Solution	Feedback
