HCP PROGRAM OVERVIEW

HCP Vision
All Colorado children and youth with special health care needs will be valued, integrated and thriving.

HCP Mission
The mission of HCP, A Program for Children and Youth with Special Health Care Needs at the Colorado Department of Public Health and Environment (CDPHE), is to ensure that children and youth with special health care needs have the opportunity to grow, learn and develop to their highest individual potential. HCP serves Colorado children and youth with special health care needs, age birth to 21, and is a resource for families, health care providers, and communities. HCP works closely with state agency partners and local public health agencies to implement three core program components:

1. HCP Care Coordination
2. HCP Specialty Clinics
3. Medical Home Systems Development

The Maternal and Child Health Bureau has identified core optimal outcomes for children and youth with special health care needs and their families. These six national outcome measures guide program efforts:

1. Families will be partners in decision-making at all levels and be satisfied with the services they receive.
2. Children and youth with special health care needs will receive coordinated, ongoing, comprehensive care within a medical home.
3. Children and youth with special health care needs will have adequate private and/or public insurance to pay for the services they need.
4. Children will be screened early and continuously for special health needs and receive timely follow up to definitive diagnosis and clinical management.
5. Community-based services for children and youth with special health care needs will be organized so families can use them easily.
6. Youth with special health care needs will have the services necessary to transition to all aspects of adult life including adult health care, work, and independence.

Definition of Children and Youth with Special Health Care Needs
The Maternal and Child Health Bureau defines the population of children and youth with special health care needs as “those who have, or are at increased risk for having, a chronic physical, developmental, behavioral or emotional condition and who also require health and related services of a type or amount beyond that required by children [and youth] generally” (Maternal and Child Health Bureau, McPherson, et al., 1998).

Supporting a Medical Home Approach
The American Academy of Pediatrics, the American Academy of Family Physicians and the National Maternal & Child Health Bureau are promoting medical home partnerships between providers, families, and community organizations, such as local public health agencies, to support the family and providers. Using a medical home approach, families and physicians work together to identify and access all the medical and non-medical services
needed to help children and their families reach their maximum potential. Essential components of a medical home approach include care that is accessible, patient/family-centered, continuous, comprehensive, coordinated, compassionate and culturally responsive.

Visit www.hcpcolorado.org or the Colorado Medical Home Initiative for more information on Medical Home.
HCP PROGRAM POLICIES & GUIDELINES

The HCP Policy & Guidelines are focused on two of the HCP components: HCP Care Coordination and HCP Specialty Clinics. The HCP Policy & Guidelines, as well as information about the third component of HCP: Medical Home Systems Development, are posted online at www.hcpcolorado.org. The hyperlinks throughout the HCP Policy & Guidelines link to companion documents such as Forms, Instructions, Roles & Responsibilities, Training Materials, and FAQ Sheets posted on the HCP Website. The intent of the companion documents is to ensure fidelity to program components and to provide consistent guidance for local public health agencies (LPHAs) and other partners contracted to provide HCP services. LPHAs and other partners are responsible for adhering to the HCP Policy & Guidelines, companion documents, HCP Training Modules, and other requirements as outlined in their individual contracts.

Orientation & Training

LPHAs and other program partners are expected to complete the HCP Orientation and program Training Modules as they become available, and as appropriate, for all HCP Components.

1. LPHAs should notify their state HCP Consultant of any changes in local HCP staffing, including vacancies and new hires within 15 business days of change date.
2. HCP Consultants will contact new LPHA HCP staff to schedule HCP Orientation and Training within 15 business days of notification.
3. New LPHA HCP staff should complete HCP Orientation and Training Modules within 45 days of start.
4. New LPHA HCP Managers should contact their state HCP Consultant for an HCP overview within 45 days of start.

CYSHCN Data System (CDS)

The CYSHCN Data System (CDS) is the data system for the care coordination and specialty clinic components of HCP. LPHAs who are contractually required to provide, or who have elected to provide, care coordination services are required to enter data into CDS. HCP has statutory authority to operate and maintain a program for children with disabilities (CRS Title 25; Article 1.h, Letter (r)). CDPHE collects the minimum data necessary to operate and maintain this program (HCP) through the CYSHCN Data System (CDS). HCP state and local offices use the data for assessment, planning, evaluation, reporting, and, in some cases, contract monitoring.

1. Access to CDS will be granted to local HCP staff, including care coordinators, support staff and managers.
2. HCP staff shall enter data into CDS within 30 days of a client contact, including, but not limited to, care coordination and/or specialty clinic documentation.

CRCSN Notifications

Colorado Responds to Children with Special Needs (CRCSN) is the birth defects monitoring and prevention program at CDPHE. CRCSN collects information about birth defects among Colorado residents diagnosed before birth and up to age three with one of the eligible conditions and may be used by HCP Care Coordinators to help connect children and families with services and supports within their communities.

Agencies have the opportunity to opt in or out of receiving CRCSN notifications during the planning process for the contract year. Agencies that choose to opt in and receive CRCSN notifications are expected to meet the following conditions:
1. Use the CDS to access “Pending System Messages” and CRCSN notifications on or about the 15th of the month.
2. Agree to follow CRCSN Notification Procedures, which includes making a minimum of two attempts to contact a family to assess what other services and supports are needed; which may include HCP Care Coordination, referral to HCP Specialty Clinic, and/or other community-based services.
3. Complete required data entry in CDS within 45 days of receiving a CRCSN notification.
4. Maintain confidentiality of CRCSN notification information using LPHA confidentiality and HIPAA policies.

CRCSN notifications contain personal health information (including medical information) and are only sent to LPHAs who have agreed to the above terms and conditions.

**HCP Consent and Release**

LPHAs are required to have families who are receiving HCP Care Coordination and/or being seen at HCP Specialty Clinics to sign a Consent and Release Form, annually, or as required by LPHA policies.

**Transportation**

HCP Specialty Clinic Coordinators and/or HCP Care Coordinators are not responsible for the transport of pediatric specialists or clients to or from clinics and are encouraged to consult their LPHA policies and guidelines concerning transportation and liability.

**Monitoring**

Monitoring is a contractual obligation and should be done in partnership with state HCP Consultants. The overall purpose of monitoring is to enhance communication, program planning and evaluation efforts, and to determine the need for resources and technical assistance. This will be accomplished through a variety of mechanisms, including but not limited to:

1. LPHAs are expected to monitor their care coordination case load volume, including individual progression through the HCP Care Coordination model using reports available within CDS. State HCP Consultants recommend running reports at least quarterly; however, monthly may be more helpful depending on case load.
2. LPHAs are expected to connect with their HCP Consultant at least once per year, unless additional TA is needed or as contractually required.
3. LPHAs can expect that:
   - State HCP Consultants will provide a brief written summary, with highlights following a site visit.
   - State HCP Consultants are available between visits, as needed, for troubleshooting, training, etc, via telephone or email.

**Continuous Quality Improvement**

State HCP staff, in collaboration with LPHAs and other partners, will work to collect aggregate HCP Care Coordination / HCP Specialty Clinic data to help inform state and local decision-making processes and to ensure that HCP is meeting its vision and mission. This includes but is not limited to family surveys, key informant interviews, follow-up and exit surveys, and focus groups.

**Translation & Interpretation**
LPHAs receiving federal funding must ensure that they will comply with applicable provisions of federal civil rights laws and policies prohibiting discrimination, including but not limited to Title VI of the Civil Rights Act of 1964, which prohibits recipients from discriminating on the basis of race, color, or national origin, which includes limited English proficiency (LEP). Translation and interpretation is a requirement for all programs receiving Federal MCH Block Grant Funding.

Effective communication with LEP individuals requires LPHAs to have language assistance services in place. There are two primary types of language assistance services: oral and written.

- LPHAs may need to identify and translate vital documents to ensure LEP individuals have meaningful access to important written information.
- LPHAs are required to provide interpretation in the family’s native language for any family who does not understand the English spoken language.

More information and guidance can be found in the ‘Language Access Assessment and Planning Tool for Federally Conducted and Federally Assisted Programs’.

**HIPAA**

LPHAs should adhere to their agency’s policies and procedures regarding protected health information (PHI), confidentiality, consent and release of information, and records retention/storage.
HCP CARE COORDINATION

Care coordination addresses the interrelated behavioral, developmental, educational, financial, medical, and social needs of an individual in order to optimize health and wellness outcomes. Care coordination is a person-and-family-centered, assessment-driven, team activity designed to meet the needs and preferences of individuals while enhancing the care giving capabilities of families and service providers (Colorado Care Coordination Resource Guide, June 2013).

HCP provides care coordination services that aim to improve the quality of life for children and youth with special health care needs and their families by improving their abilities to appropriately and effectively utilize the health care system in collaboration with the child/youth’s primary care provider.

HCP Care Coordinators shall work with families to:

- promote participation in decision making
- promote independence
- identify community and state services and resources
- help with referrals to community and state services and resources
- provide education and guidance in coordinating health care
- promote communication between providers and community resources
- coordinate access to pediatric specialty care
- navigate options to help pay for health care
- coordinate transition to adult health care
- assist with identifying respite care resources
- collaborate with a child's health care providers
- support a medical home approach using evidence based activities

Policy & Guidelines

Staffing

1. HCP Care Coordinators and program staff are to provide HCP Care Coordination services according to the HCP Care Coordination model.
2. The HCP Care Coordination model supports a multi-disciplinary team approach, when appropriate and feasible. This team must include a registered nurse.

LPHA Capacity

1. HCP Care Coordination services are based on client need and LPHA capacity. Regardless of whether an LPHA is providing the full model of HCP Care Coordination, LPHAs must provide information to families and community members seeking resources, as a core public health service.
2. LPHAs are responsible for providing care coordination and/or linking children living within their jurisdiction to care coordination services, unless arrangements have been made with a neighboring LPHA to assume this role.
   a. For children living in counties that have opted out of HCP Care Coordination, local HCP staff are encouraged to refer the child/youth and their family to their primary care provider, Regional Collaborative Care Organization (RCCO), and/or other community-based organizations for assistance coordinating their care, as appropriate.
   b. For children living in counties that have opted in to HCP Care Coordination, local HCP staff are encouraged to collaborate with primary care providers, the RCCO and/or other community-based organizations to coordinate triage and referral for care coordination services, in order to maximize resources and avoid duplication of services.
c. LPHAs, in collaboration with their RCCO, are encouraged to work towards developing a formal agreement to establish roles and responsibilities for care coordination in the region.

**HCP Care Coordination Model**

LPHA’s are expected to comply with the HCP Policy and Guidelines and the HCP Care Coordination Model. The HCP Care Coordination model consists of the following elements and process:

---

**Information Only**

In the HCP model of care coordination, providing resources for children and youth with special needs is referred to as ‘Information Only.’ It encompasses all information, resources, and/or referrals given to families, providers, and other community agencies, when the family does not want or need the full model of HCP Care Coordination.

1. All LPHAs are to provide, at a minimum, information, resources, and referrals to families, providers, and other community agencies.
2. LPHAs are not required to enter ‘Information Only’ data in CDS; however, it is highly encouraged. Per the MCH/HCP, OPP/HCP, or HCP contracts, an LPHA may be required to provide these numbers as a part of the MCH/HCP, OPP/HCP, or HCP annual report.

**Intake Interview**

The ‘Intake Interview’ is the first core component of the HCP Care Coordination model. The HCP Care Coordinator uses the Intake Interview to determine whether or not the family needs and wants care coordination. The tool is used to identify and support the family’s strengths, concerns, culture, and values. It also is used to collect baseline data about HCP clients before care coordination activities begin.

1. The HCP Care Coordinator must conduct an Intake Interview with each child/youth and their family who may want or benefit from care coordination. The Intake Interview must be documented in CDS.
2. If a client has been inactivated in CDS and needs to resume care coordination at a later date, a new Intake Interview must be conducted and documented in CDS before continuing to a new Assessment.

**Assessment of Need**

The ‘Assessment’ is the second core component of the HCP Care Coordination model. The Assessment provides an opportunity to explore, build, and strengthen the relationship with the family, as well as learn about and consider the child/youth’s special health care needs and the family’s concerns, strengths and goals.

1. Every child/youth who is receiving HCP Care Coordination must have an Assessment on file which has been documented in CDS.
2. The HCP Care Coordinator must review and update the Assessment every six months, or more frequently as needed, and such reviews must be documented in CDS.
3. The HCP Care Coordinator must use the information from the Assessment to create and update the Action Plan.
4. The HCP Care Coordinator must complete an Assessment with each child/youth and their family prior to moving on to the Action Plan.

**Social Determinants of Health**

The Social Determinants of Health (SDoH) questions are used to determine Federal Poverty Levels (FPL) and should be collected during the assessment process. SDoH fields are required to be documented in CDS and should be used by the HCP Care Coordinator to help identify appropriate community and state services and resources for the child/youth and family. The Social Determinants of Health information must always be kept up to date in CDS with the most recent and accurate information. It is recommended that HCP Care Coordinators review this information with the family each time they complete a 6 month review.

**Medical Conditions**

The Medical Conditions form is a place to document the child/youth’s medical condition(s). It is required that medical conditions are documented in CDS for each client. This information helps guide HCP Care Coordination activities and identification of potential community and state services and resources and/or referrals. The medical condition(s) must always be kept up to date in CDS with the most recent and accurate information. It is recommended that HCP Care Coordinators review this information with the family each time they complete a 6 month review.

**Action Plan**

A written ‘Action Plan’ is the third core component of the HCP Care Coordination model. The Action Plan is intended to be a family-friendly, take-away document and is developed through a partnership between the child/youth, their family, the HCP Care Coordinator, and any other primary care provider and/or ancillary service providers when appropriate.

The Action Plan is used to create goals and next steps for the child/youth and their family related to current care coordination needs.
1. The HCP Care Coordinator must create an Action Plan for each child/youth and their family who is receiving care coordination. Action Plans must be documented in CDS. This includes identifying which pre-populated goal statements have been included on the Action Plan.

2. The HCP Care Coordinator must develop and prioritize Action Plan goals in partnership with the child/youth and their family.

3. The HCP Care Coordinator must provide the family with a print copy of the Action Plan.

4. The HCP Care Coordinator must review and update the Action Plan as frequently as needed in order to help the child/youth and their family achieve and/or make progress on established goals. Action Plan Reviews must be documented in CDS. This includes identifying which pre-populated goal statements have been completed on the Action Plan.

**Six-Month Review**

The six-month review is the fourth component of the HCP Care Coordination model. HCP Care Coordinators must complete a six-month review of a child/youth’s progression through the HCP Care Coordination model. This reassessment is a comprehensive review of the activities that have commenced during this period.

1. A review of strengths and concerns should be completed by reviewing the child/youth’s most recent Assessment Form and Action Plan and should occur after any of the following events:
   a. Child/youth and their family’s situation or conditions change
   b. Child/youth and family have achieved the established goals, as identified on the written Action Plan
   c. Six months has elapsed since the last Assessment

2. The six-month review should result in one of the following activities or outcomes:
   a. Identify barriers to achieving established goals and updated the Action Plan for continued progress
   b. Identify new priorities and goals resulting in the creation of a new Action Plan
   c. Case Inactivation

3. The HCP Care Coordinator must document both the Assessment and Action Plan reviews in CDS, including documenting Follow-up and Exit Surveys.

**Case Inactivation**

The fifth core component of HCP Care Coordination is ‘Inactivation’. After the six-month review, or earlier as described under Six-Month Review (above), if it is determined that all priorities and goals have been achieved by the family and no further priorities or goals are identified, the HCP Care Coordinator and family should consider Inactivation. It is important that all parties understand that the family can return to HCP Care Coordination at any time, should the need arise.

Questions to ask when considering Inactivation:

- Does child/youth need the intensity of services HCP Care Coordination provides?
- Can care coordination activities be transitioned to the child/youth’s primary care provider or another community-based agency?

*Clients not receiving active care coordination must be inactivated in CDS.* Active care coordination is defined as a child/youth moving through the HCP Care Coordination model and having a current Action Plan.
Delivery of Service

HCP staff are encouraged to adhere to a focused timeline for delivery of HCP Care Coordination services, as illustrated in the example below.

*Referral Received*

**Day 0**
- Intake Interview Completed

**Day 14**
- Assessment & Action Plan Completed

**Day 45**
- Action Plan Review(s)

**Day 60-150**
- 6-Month Review of Assessment & Action Plan

**Day 180**
- New Action Plan OR Case Closure

**Timeline for Delivery of HCP Care Coordination Services**

The intent of this focused approach is to address the family’s needs while empowering them to navigate day to day issues that affect their family. A family receiving care coordination services should ideally progress through the HCP Care Coordination model in approximately six months. Within those six months, families should demonstrate measurable progress toward meeting their care coordination goals.
HCP SPECIALTY CLINICS

Purpose of the HCP Specialty Clinics

CDPHE contracts with University Physicians, Inc. (UPI) and LPHA specialty clinic host sites to:

- Provide access that would otherwise not be available to specialty care in rural and frontier communities of Colorado, in the areas of neurology, orthopaedics, and rehabilitation.
- Coordinate pediatric specialty care in collaboration with local primary care providers and model a medical home team approach for the children and youth with special health care needs and their families who receive care through HCP Specialty Clinics.

In the fall of 2011, HCP engaged in a reassessment of HCP Specialty Clinics. The purpose was to identify opportunities to improve the overall efficiency and consistency of the HCP Specialty Clinics, while ensuring that the families in rural areas of Colorado continue to have access to high quality, specialized services. As part of the reassessment and in collaboration with UPI and our contracted LPHA host sites, the following guiding principles were established:

1. Any child/youth can be referred and receive care in any HCP Specialty Clinic location throughout the state, regardless of their county of residence.
2. Clinic locations shall be determined based on need and geographical considerations that affect access.
3. HCP shall work to:
   a. ensure continued access to high quality, specialized services for children and youth with special health care needs.
   b. improve the overall efficiency of HCP Specialty Clinics to maximize the number of children and youth with special health care needs who are able to access care.
   c. prioritize resources to increase access to care in rural areas of Colorado.
   d. establish standard processes across clinic locations to ensure that children and youth with special health care needs and their families experience a consistently high quality of care.
4. HCP Specialty Clinics and pediatric specialists shall support a medical home approach through communication with and referral back to the child/youth’s primary care provider to promote coordinated care.

Policy and Guidelines

Through HCP Specialty Clinics, HCP aims to reduce barriers to families such as cost, lost work or school time and travel, and minimize the number of trips to Metropolitan areas for specialty care that a family might otherwise have to make.

The purpose of the HCP Specialty Clinics Policy and Guidelines is to provide consistent guidance for UPI, the University of Colorado School of Medicine departments and LPHAs contracted to host and/or staff HCP Specialty Clinics.
Staffing

1. UPI shall provide pediatric specialists in neurology, orthopaedics, and rehabilitation medicine.
2. LPHA host sites must ensure that HCP Specialty Clinic teams meet HCP Specialty Clinic Standards:
   a. Teams are led and/or supervised by a registered nurse (RN).
   b. Each clinic day will have at least 2 staff persons present at each clinic, one of which must be a nurse.
   c. The HCP nurse must participate in triage activities.
   d. A translator must be onsite during clinics, when needed.
3. HCP Clinic Coordinators and LPHA host site support staff are to coordinate Specialty Clinics (including all pre-, day of-, and post-clinic activities) according to the HCP Specialty Clinic Policy and Guidelines and its companion documents.

Referring a Child to HCP Specialty Clinic

1. Referrals for HCP Specialty Clinics must come from a referring physician; however, LPHAs (and/or the HCP Care Coordinator) from the child/youth’s county of residence are encouraged to help facilitate completion of the Referral Form as needed.
2. HCP Care Coordinators and HCP Specialty Clinic Coordinators are responsible for understanding their individual roles and responsibilities.
3. The HCP Specialty Clinic Coordinator will use the referral form to refer the family to their local public health agency for any community-based information and resources and/or care coordination, as needed/available.

Record Release from HCP Specialty Clinics

1. Requests for HCP Specialty Clinic records can only include HCP Specialty Clinic Visit forms, including the HCP Specialty Clinic Referral Form, HCP Specialty Clinic Medical History, and the HCP Specialty Clinic Visit Record.
2. Copies of any records obtained by the HCP Specialty Clinic Coordinator cannot be sent to another agency or party. Record requests must be submitted directly to the agency where the original record resides.
3. See HCP Consent and Release and HIPAA policies for more information.

Documentation

1. For patients who are also receiving HCP Care Coordination, the clinic host site must maintain a chart for patients specifically related to clinic visits that are separate from care coordination records.
2. HCP Specialty Clinic Coordinators are responsible for obtaining and/or completing the following documents and documenting, as appropriate, in CDS:
   a. New Referral / Intake
      i. HCP Referral Form
      ii. HCP Specialty Clinic Consent and Release of Information Form
      iii. HCP Specialty Clinic Family Information Questionnaire
      iv. HCP Specialty Clinic Medical History
v. Any and all forms required by UPI and/or Children’s Hospital Colorado  
b. Day of Clinic  
   i. HCP Specialty Clinic Visit Record  
   ii. Any and all forms required by UPI and/or Children’s Hospital Colorado  
c. Annually  
   i. HCP Specialty Clinic Consent and Release of Information Form  
   ii. HCP Specialty Clinic Family Information Questionnaire  

3. HCP Specialty Clinic Coordinators shall confirm the occurrence of HCP Specialty Clinics by completing the HCP Specialty Clinic Data Collection Tool and returning it to their HCP Consultant within 1 week of the scheduled clinic.  

4. HCP Specialty Clinic Coordinators shall monitor clinic wait list, new specialty providers in the community and number of children scheduled for clinics to support rescheduling or canceling a regional specialty clinic.  

5. HCP Specialty Clinic Coordinators shall provide an initial schedule to Children’s Hospital Colorado schedulers no later than three weeks prior to the scheduled clinic day. Updates to the schedule should be sent at least one week prior to the scheduled clinic day, when possible.  

6. HCP Specialty Clinic Coordinators shall provide a list of patients seen to the Children’s Hospital Colorado transcription department at the end of each clinic day, in order to facilitate the timely and accurate dispersal of visit reports.  

7. HCP Specialty Clinic Coordinators shall provide families with a copy of the HCP Specialty Clinic Visit Record at the end of clinic in order to ensure that families are aware of next steps.  

8. HCP Specialty Clinic Coordinators shall ensure that a copy of the HCP Specialty Clinic Visit Record and final Pediatric Specialist’s dictation are provided, according to the host site’s HIPAA Guidelines to:  
   a. the child’s PCP  
   b. the HCP Care Coordinator in the patient’s county of residence, per the host site’s HIPAA guidelines.  
   c. The LPHA in which the child resides will not receive a copy of the HCP Specialty Clinic Visit Record or the Pediatric Specialist’s dictation.  

Clinic Set Up  

LPHA host sites are expected to:  

1. provide special consideration and access for patients with wheel chairs, walkers, etc.  
2. have a scale, height and length measurement devices, head circumference measuring tape, growth charts, and a copier readily available.  
3. assure a safe environment that meets the developmental needs of the children and youth seen in clinic.  

Supporting a Medical Home Approach  

Outreach to primary care providers and community partners, including HCP Care Coordinators in surrounding counties, regarding referral processes and the date, time and location of specialty clinics is the responsibility of HCP Clinic Coordinators.
Scheduling Clinics

1. In collaboration with LPHA host sites and pediatric specialists, the University of Colorado School of Medicine departments shall determine HCP Specialty Clinic dates at least 6-12 months in advance.

2. To be considered a full one-day clinic, a minimum number of patients must be scheduled. This minimum number shall be determined annually by the University of Colorado School of Medicine departments for each specialty.
   a. For FY15, the University of Colorado School of Medicine departments have set the following guidelines for scheduling:
      i. Neurology – at least 8 children/youth scheduled
      ii. Orthopaedic – at least 20 children/youth scheduled
      iii. Rehabilitation – at least 15, and no more than 25, children/youth scheduled
   b. Should a HCP Specialty Clinic Coordinator not be able to reach the minimum guidelines for scheduling, he/she must contact his/her state HCP Consultant prior to cancelling clinic to discuss next steps.

3. On occasion, Fellows may attend Specialty Clinics with UPI pediatric specialists. No changes to the minimum/maximum number of scheduled patients is allowed.

4. UPI and/or University of Colorado School of Medicine department schedulers are to notify the appropriate [HCP Specialty Clinic Coordinator](mailto:hcpcolorado.org) if they wish to schedule additional appointments to the master schedule for any day of clinic.

5. Clinic dates, locations, and specialties must be provided to the HCP Consultant and will be posted on the HCP Calendar at [www.hcpcolorado.org](http://www.hcpcolorado.org) as they become available.

Cancelling Clinics

1. If the HCP Specialty Clinic Coordinator is unable to schedule the minimum number of appointments, and it is determined that clinic should be cancelled, the cancellation must be done at least three weeks prior to scheduled clinic.
   a. Clinics cancelled due to low utilization will only be rescheduled when both pediatric specialists and HCP staff have availability.

2. The University of Colorado School of Medicine departments shall notify the HCP Specialty Clinic Coordinator at least three weeks prior to a scheduled clinic if there is a scheduling conflict that would cause a clinic to be cancelled or rescheduled.
   a. Every effort must be made to reschedule clinics cancelled due to scheduling conflicts.

3. For the safety of families, HCP Program Staff, and Pediatric Specialists, clinics may occasionally need to be cancelled or rescheduled due to inclement weather or unsafe travel conditions.
   a. Pediatric specialists and HCP Specialty Clinic Coordinators must be sure to notify each other as soon as possible in case of flight delays, road closures, or any other problems due to weather.
   b. Clinics cancelled due to inclement weather will only be rescheduled when both pediatric specialists and HCP staff have availability.

4. All cancellations and rescheduled clinics must be reported to the state HCP Consultant at the time the decision is made.
Triage Appointments

1. HCP Specialty Clinic Coordinators, in collaboration with the pediatric specialists, shall triage new and follow-up appointments based on the severity of symptoms and not based on the county in which the child resides.
2. HCP Specialty Clinic Coordinators shall connect the referring primary care provider to the pediatric specialist when needed for consultation about the urgency of clinic visit and any tests needed prior to clinic.
3. If clinic is not full and time allows, HCP Specialty Clinic Coordinators and pediatric specialists are encouraged to use up to 1 hour per 8 hour clinic day to consult with and/or train local providers, or triage patients.

HCP Clinic Support Fees

The HCP Specialty Clinic support fees provide financial support to contracted LPHA host site in order to help offset expenses related to coordinating the clinics. The HCP Specialty Clinic Coordinator is responsible for charging families according to a sliding scale fee. Families and HCP Specialty Clinic Coordinators should be aware of the following guidelines:

1. Fees are in addition to any co-pays or deductibles that may be collected by UPI.
2. Fees are not charged to families whose child/youth is enrolled in Medicaid.
3. Fees are assessed based on a self report of household income.
4. If a family refuses to self report income, a $100.00 maximum fee for each clinic will be charged.
5. A family who has more than one child seen in clinic will be charged a clinic support fee for each child seen that day.
6. Families shall not be denied services for inability to pay any of the sliding fee charges.
7. Sliding scale fees are based on Federal Poverty Level (FPL), and are calculated in CDS once SDoH data has been collected and entered.

<table>
<thead>
<tr>
<th>% Poverty Level (FPL)</th>
<th>At or below 100%</th>
<th>101 - 133%</th>
<th>134 – 185%</th>
<th>186 – 211%</th>
<th>212 – 399%</th>
<th>400 – 450%</th>
<th>Greater than 450%</th>
</tr>
</thead>
<tbody>
<tr>

<td>$30</td>
<td>$50</td>
<td>$75</td>
<td>$100</td>
</tr>
</tbody>
</table>
Clinic Billing
Families should be aware prior to their appointment that there may be a cost to attend HCP Specialty Clinics. Billing families for HCP Specialty Clinic is only permissible under the following guidelines:

1. UPI may bill Medicaid, CHP+, and private insurance companies:
   a. UPI must accept Medicaid/CHP+ payment as full reimbursement.
   b. UPI may bill a family with private insurance for any co-pay due or when an insurance payment is denied because the deductible has not been met. Families may be responsible for their co-pay and/or deductible and should make payment directly to UPI.

2. Patients unable or unwilling to obtain their own insurance (identified as “self pay”) will not be billed unless the family and the pediatric specialist agree before services are rendered on payment plans based on the family’s ability to pay. This should be documented at the time of visit.

3. UPI may choose not to bill families and, if so will receive no further compensation.

Increasing, Reducing, or Closing Specialty Clinics
The HCP Consultant reviews potential changes for regional clinics as part of the state contracting process. Annually, the state HCP staff determines, in collaboration with UPI, the LPHA host sites, and the University of Colorado School of Medicine departments, any changes to the HCP Specialty Clinic Benchmarks based on the following:

- pediatric specialists’ availability and capacity
- need and geographical considerations that affect access
- current wait lists and clinic utilization

Revisions during the fiscal year must be mutually agreed upon by state HCP, Contracted LPHA Host Sites, HCP Specialty Clinic Coordinators, UPI, and the University of Colorado School of Medicine department heads for neurology, orthopaedic and rehabilitation.

Tele-Medicine & Electronic Medical Records
1. HCP, in collaboration with UPI, University of Colorado School of Medicine, and the LPHA Host Sites, shall work to maximize HCP Specialty Clinics through telemedicine.

2. HCP Specialty Clinic Coordinators are required to have access to EPIC, an electronic health record used by pediatric specialists.

Workgroup Participation
Representatives from UPI and HCP Specialty Clinic Coordinators are required to participate in HCP Specialty Clinic Workgroup meetings. During these meetings, participants work to develop standardized processes and protocols to support quality improvement and efficiency across all HCP Specialty Clinics in the state.
CDPHE HCP CARE COORDINATION CONTACT INFORMATION

Program for Children with Special Health Care Needs (HCP)
Prevention Services Division
Colorado Department of Public Health and Environment
4300 Cherry Creek Dr. S., Bldg. A-4
Denver, CO 80246

Angie Goodger, MPH, MHA
HCP Consultant
(303) 692-6316 direct
angela.goodger@state.co.us

Provides technical assistance and support for LPHAs with MCH/HCP contracts receiving $50,000 or more, as well as LPHAs that have HCP Specialty Clinics located in their county.

Support areas include:
• HCP Care Coordination
• General CDS questions
• HCP Specialty Clinics

Jane Gerberding, BSN, RN
HCP Nurse Consultant
(303) 692-2024 direct
jane.gerberding@state.co.us

Technical lead on local system’s building efforts and provides support to agencies who have developed a Medical Home Local Action Plan as part of their MCH contract. In addition, Jane convenes learning circles around various topics related to Medical Home and the children and youth with special health care needs population

Kelsey Minor, MPH
HCP Consultant
(303) 692-6315 direct
kelsey.minor@state.co.us

Provides technical assistance and support for LPHAs with OPP/HCP contracts receiving less than $50,000.

Support areas include:
• HCP Care Coordination
• CDS Oversight & Functionality
• General CDS questions
• CRCSN support

Jennie Munthali, MPH
HCP Unit Manager
(303) 692-2435 direct
jennie.munthali@state.co.us

Responsible for overall management and strategic direction of the HCP unit including program and budget development and evaluation. In addition, Jennie is responsible for representing the program on governor appointed committees and coordinating the H-PAC meetings.

*Number of clinics is based on full 8 hour - day clinics. The number of days on location may increase with ½ day clinics.
Roles & Responsibilities

CDPHE – HCP Consultant

CORE RESPONSIBILITIES
• Maintains current HCP Policy and Guidelines and provides technical assistance and orientation and training to support implementation of the policy and guidelines
• Monitors local public health agency HCP contract requirements
• Facilitates and coordinates HCP Specialty Clinic and/or Care Coordination Workgroup meetings
• Maintains standardized HCP forms

CONTINUOUS QUALITY IMPROVEMENT / DATA
• Coordinates collection of data for HCP Care Coordination and Specialty Clinics
• Ensures CDS functionality and provides technical assistance
• Collects and analyzes HCP data

SPECIALTY CLINIC
• Oversees and manages the HCP Specialty Clinic contract with University Physicians, Inc. (UPI)
• Identifies LEAN clinic procedures in collaboration with the HCP Specialty Clinic Work Group, HCP Specialty Clinic Host Sites, and University of Colorado School of Medicine departments of neurology, orthopaedic and rehabilitation and contracted services

LPHA – HCP Care Coordinator and HCP Specialty Clinic Coordinator
• Ensures fidelity to the HCP Policy and Guidelines
• HIPAA/ Confidentiality
  o Maintain confidentiality of HCP care coordination information using local public health agency confidentiality and HIPAA policies
  o Provides training to local public health agency staff on agency HIPAA policies and personal health information confidentiality
• Participates in HCP Workgroup meetings, as requested
• Notifies the state HCP Consultant with changes in name and/or contact information of designated staff
• Designates a consistent HCP Care Coordinator and/or HCP Specialty Clinic Coordinator
• Assists with collection of data, when requested
• Documentation
  o Maintains separate charts for HCP Care Coordination and HCP Specialty Clinics
• Community Outreach
  o Contacts primary care providers and community partners with referral procedures, future specialty clinic dates, types of clinics and provider names
• Referrals
  o Refers families for HCP Care Coordination in the child’s county of residence for community-based information and resources, when needed
  o Refers family to a HCP Specialty Clinic, when needed
• All LPHA HCP staff and their supervisors at agencies that have “opted in” to providing HCP care coordination must complete HCP training available online at www.hcpcolorado.org
Referral to HCP Specialty Clinic
When assisting with a referral to HCP Specialty Clinic, the HCP Care Coordinator from the child/youth’s county of residence shall:

1. Help the primary care provider complete the HCP Specialty Clinic Referral Form and send completed HCP Referral Form to HCP Specialty Clinic Coordinator
2. Assess if family needs community-based resources and refer, as appropriate/available
3. Share urgency of clinic visit, if known, and whether family will need an interpreter during clinic
4. Provide any additional health history to assist with clinic visit
5. Follow up with the family after HCP Specialty Clinic visit to ensure understanding of pediatric specialist’s recommendations and next steps
6. Clarify questions or concerns with the HCP Specialty Clinic Coordinator, as needed
7. Assist family with identifying transportation resources as needed
8. Contact the child/youth’s primary care provider with questions or concerns or with clinic follow-up, as needed
9. Update the child/youth’s care coordination action plan with clinic follow-up information to include the family’s role, Care Coordinator’s role and PCP’s role, and provide a printed copy for the family
10. File the action plan and clinic documentation in child’s care coordination chart
11. Update CDS, as appropriate.

Referral from Specialty Clinic to HCP Care Coordination and/or PCP
In order to facilitate communication between the HCP Care Coordinator and the HCP Specialty Clinic

1. For children/youth receiving active HCP Care Coordination, the HCP Specialty Clinic Coordinators must:
   a. notify the HCP Care Coordinator in the child/youth’s county of residence of receipt of new referral to HCP Specialty Clinics
   b. send the appointment date and time to the HCP Care Coordinator
   c. Refer child/youth to HCP Care Coordination in the county of the child’s residence if there is reason to believe that the child/youth and their family might benefit from HCP Care Coordination services
   d. Update CDS, as appropriate.
2. For child/youth NOT receiving active HCP care coordination, including those who reside in a county without HCP Care Coordination:
   a. The Clinic Coordinator will refer the family to the HCP Care Coordinator in the county in which the child resides for any community-based information and resources and/or care coordination, as needed/available
   b. The LPHA in which the child resides will not receive a copy of the HCP Specialty Clinic Visit Record or the Pediatric Specialist’s dictation.
