

CARE COORDINATION

HCP A program for children & youth with special health care needs

About HCP care coordination

HCP serves children and youth who require more health and related services than other children generally.

HCP helps families of children and youth address behavioral, developmental, educational, financial, medical and/or social needs to **optimize** their **health and wellness outcomes**.

There are **no restrictions or eligibility requirements** based on income or diagnosis to receive HCP services. HCP care coordination services are free.

We help families find:

- Screenings and clinics including specialty care
- Medical care, health and community services
- Financial resources, including help with insurance
- Family support groups
- Transition services
- Answers to questions

HCP assists Colorado children and youth from birth to 21 with special health care needs.

Contact us

Contact the HCP program through your county health or human services office.

SPECIALTY CLINICS

HCP A program for children & youth with special health care needs

About HCP specialty clinics

HCP hosts clinics to expand access to specialty clinic care for children and youth in rural and frontier communities of Colorado. Areas of specialty care include: neurology, orthopaedics, and rehabilitation.

Any child or youth can receive care from any specialty clinic location. There are no income restrictions to receive services.

Children are not required to have insurance to attend a specialty clinic. **Most services are free and no family is ever turned away because they are unable to pay.** For more information, talk to your HCP clinic coordinator.

To attend an HCP specialty clinic near you, **ask your doctor for a referral.**

HCP assists Colorado children and youth from birth to 21 with special health care needs.
