

THE SURVEY IS ADMINISTERED FROM SEPTEMBER TO EARLY JANUARY.

The fall survey is administered from September through early January. Results are typically available within the same school year. The time between surveying and reporting is used for data preparation, analysis, quality assurance procedures, and creation of report, charts and graphs.

ASKING A YOUNG PERSON QUESTIONS ON A SURVEY DOES NOT INFLUENCE THEIR HEALTH BEHAVIOR.

In fact, we have seen risky health behaviors steadily decline nationwide since youth survey activities amplified over 25 years ago

YOUNG PEOPLE RESPOND TO SURVEYS JUST AS CREDIBLY AS ADULTS.

Research shows that young people respond just as credibly as adults on anonymous and confidential health surveys. Data analysis includes thorough checks to omit the very small percentage of young people who falsify their answers.

COLORADO LAW REQUIRES THAT PARENTS ARE NOTIFIED ABOUT SURVEYING YOUTH IN SCHOOLS.

Every district has their own policy regarding parental notification and consent. Examples of consent forms are available at www.HealthyKidsColo.org

THE HEALTHY KIDS COLORADO SURVEY HAS A RIGOROUS POLICY TO PROTECT THE CONFIDENTIALITY AND ANONYMITY OF YOUNG PEOPLE TAKING THE SURVEY.

Research shows that young people respond just as credibly as adults on anonymous and confidential health surveys. Data analysis includes thorough checks to omit the very small percentage of young people who falsify their answers.

THE HEALTHY KIDS COLORADO SURVEY IS COMPLETELY VOLUNTARY.

Schools notify students and their parents in advance of the survey that their participation is completely voluntary. Parents can choose to have or not have their child participate and a young person can choose whether to participate or not. In fact, the survey goes through various layers of permission before a student even sees it.
