

## Grant Based Performance Measure Weighting Tool

This tool calculates the Weighted Veteran Entered Employment Rate (EER).  
The VETS 200 C Report is the source of the data items to be entered and matched.

### First Data Entry Step

**Enter** the Total Veterans & Eligible Persons Entered Employment Following Staff Assisted Services (EEFSAS) Numerator. This appears in the VETS 200 C Report in Column C, Row 17.

### Second Data Entry Step

**Enter** the Total Veterans & Eligible Persons EEFSAS Denominator. This appears in the VETS 200 C Report in Column C, Row 18.

### First Calculation Step

This is the **Calculated Total Veterans & Eligible Persons EEFSAS Rate** and should **match** Column C, Row 19 of the VETS 200 C Report : (EEFSAS Numerator / EEFSAS Denominator)

### Third Data Entry Step

**Enter** the Entered Employment Following Intensive Services Numerator. This appears in the VETS 200 C Report in Column C, Row 20.

### Second Calculation Step

This is the **Calculated Veterans Receiving Intensive Services Weighting Factor**:  
(Entered Employment Following Intensive Services Numerator) X (0.25)

### Third Calculation Step

This is the **Calculated Weighted Veteran Numerator**: (Veteran Numerator +  
Calculated Veterans Receiving Intensive Services Weighting Factor)

### Final Calculation Step

This is the **Calculated Weighted Veteran Entered Employment Rate**: (Calculated  
Weighted Veteran Numerator / Total Veterans & Eligible Persons EEFSAS  
Denominator)
