Provided by the Contraceptive CHOICE Project at Washington University School of Medicine in St. Louis, the *Contraceptive Counseling Webinar* will teach non-clinicians and clinicians alike to deliver comprehensive, medically-accurate, non-biased contraceptive counseling.

The contraceptive counseling model was utilized in the CHOICE Project, a large cohort study of St. Louis women and their contraceptive choices. Among the results, the study indicates that contraceptive counseling can be effectively provided by non-medical staff<sup>1</sup> and that women choose highly effective contraceptive methods when given accurate, comprehensive information and when cost barriers are removed.<sup>2</sup>

**TUESDAY, JANUARY 7th from 10:00 a.m.—12:00 p.m. MST**

**To register for the two-hour webinar, please visit:**
