

PACIFIC'S MOBILE SITE FUNCTIONALITY

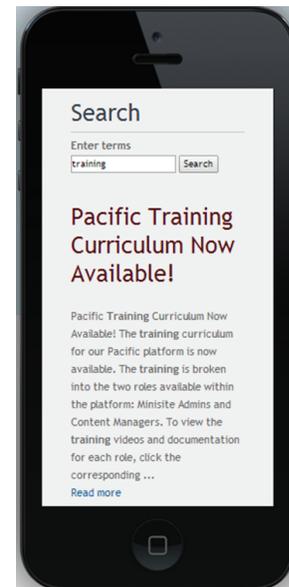

1. EFFICIENT CALLS-TO-ACTION

Users accessing Pacific sites on their mobile device are immediately given options for finding information or submitting documents. At the top of their device's screen are options to search terms, click a menu link, or access specific pages via slider images. Users will have no problem efficiently finding the information they need and without the hassles of bulky mobile sites.

3. ACCURATE SEARCH BAR

Nested at the top of each page is a search bar. Users can use this to find all pages relative to the term(s) they input.

2. STREAMLINED INFORMATION ENTRY

Some users will need to submit questions, comments, and documents via Colorado.gov's Pacific sites. Luckily, they can enter their information easily via Pacific's webform function, which allows users to upload various file types. It also labels required information, and sends confirmation messages.

4. EASY-TO-USE EVENTS CALENDAR

All Pacific sites have the option of placing an events calendar on their homepage. The calendar clearly lists all upcoming scheduled activities. Users can click on the hyperlinked dates to find more details and information.
