Henderson, CO 80640

Subject: Model: 1000, 1250, 1500 Septic Tank - Acceptance  
For Use in Colorado On-site Wastewater Treatment Systems

Dear Mr. Arnold:

Pursuant to section 43.13 of the On-site Wastewater Treatment System Regulation 5 CCR 1002-43 (Regulation 43), the Water Quality Control Division (Division) has reviewed revised drawings and specifications received July 23, 2014 for the following septic tanks:

- 1000 gallon
- 1250 gallon
- 1500 gallon

Subsequent to our review, the Division finds the tank design to be consistent with the criteria of section 43.9 of Regulation 43. The Division also provides this acceptance of the tank(s) referenced above as meeting these criteria and acceptable for use in Colorado.

Note: Pursuant to section 43.13(G)(2), at least five percent of tanks must be tested for watertightness at the manufacturing facility. A summary of testing results must be submitted to the Division on an annual basis. The testing results submittal form is available on the Division website.

This acceptance does not constitute an endorsement of this product. As individual local public health agency regulations may be more stringent than Regulation 43, the Division cannot ensure the acceptance of a septic tank within any given jurisdiction.

If you have any questions regarding the Division's review or findings, please contact me at (303) 692-2366 or [chuck.cousino@state.co.us](mailto:chuck.cousino@state.co.us).

Sincerely,

Charles J. Cousino, REHS  
On-site Wastewater Treatment System Coordinator
