Sample Collection

- Run cold water tap for 3-5 minutes to flush pipes
 - ~ Collect sample from non-swivel, non-aerated tap
- Fill bottle to the base of the neck
- One bottle can be used for BOTH a nitrate and a nitrite test if the sample is for the same site.

Bottle labels

- Write the customer name and collection date and time on each label and affix one label to each bottle
- If submitting bottles for more than one sample site/location please describe the location so we can tell the samples apart

Request for Analytical Services Form

- If sampling more than one site or location please submit one request for analytical service form PER site or location
- Verify that the customer address is correct and that the address can accept mail
 - ~ Record an email address if emailed results are desired
- Record the system's PWS ID, system name, address, and system description
 - ~ See back page for an example
 - ~ Results will be sent to the Water Quality Control Division if a PWS ID is provided

- Record the collection date and time
- Record the purpose, water type, and chlorine residual (if needed) of the sample
- Record the temperature of the water if known or needed

Submitting samples to the laboratory

- The laboratory is not open on weekends or state holidays, so plan your sampling accordingly
- Plan to deliver the samples to the laboratory as soon as possible
 - ~ This test has a 48 hour hold time and must be received before then for the sample to be valid
- Either hand deliver or overnight the samples to:

Laboratory Services Division
