SSN Verification Screen

Indicates SSN verification or the reason for non-verification.

- Blank = Records failing initial edit checks and not making it as far as the verification process
- V = SSN is verified. Not returned for SCHIP or PCIP requests
- X = SSN is verified, NUMIDENT indicates individual is deceased. The Date of Death on the NUMIDENT will be displayed in the Verified SSN Data field (positions 109-153 of the Type 1 response) for those records where source of Death data is any source other than a State that restricts redisclosure of the State reported Date of Death. *Date of Death is not returned for SOLQ transactions.* Not returned for SCHIP or PCIP requests. SSN not found on NUMIDENT
- 1 = Surname matched, but DOB did not match NUMIDENT. The DOB on the NUMIDENT will be displayed in the Verified SSN Data field (positions 109-153 of the Type I response)
- 3 = Surname or given name does not match NUMIDENT (e.g., SSN submitted for John Smith belongs to Pam Jones); DOB was not checked.
- F = SSN is verified (surname ignored because no match on surname +/- 1 letter difference). Surname provided does not match database for that SSN, but month/year of Date of Birth, first 3 letters of First Name and the Middle Initial match. Picks up cases where person has changed their surname (e.g. marriages, adoptions).
- M = SSN verified via MBR or SSR rather than NUMIDENT (overlays value of '1')
- P = SSN verified via MBR or SSR rather than NUMIDENT (overlays value of '3')
- R = SSN verified via MBR or SSR rather than NUMIDENT (overlays value of '5')
- Z = Verification code for records in which State submitted a CAN (claim account number) instead of an SSN. SSA found the CAN on the MBR, but did not verify the SSN with the NUMIDENT
- * = The input SSN was not verified. SSA located and verified the SSN returned in the Verified SSN Data field (positions 109-153 of the Type I response). The SSN on the response was located by swapping every number in the input SSN with every other number; this resolves transcription errors.
- & = Multiple SSNs are provided in Verified SSN data field, up to five. This response will immediately follow a = response with an alpha verification code in about 1% of the cases. The multiple SSNs are ones which were previously issued to individuals. Benefits may or may not have been paid on the multiple SSNs. *This code is not returned for SOLQ transactions.*
- . = Same as Blank
