A non-profit organization based on the spirit of the State of Colorado working family. It's about State employees and retirees helping one another with emergency financial support in times of personal crisis.

KEYNOTE: Attitude, Baditude in Safety
Gary Lietz

When an organization builds a strong safety culture, the underlying attitude or "baditude" shapes the behaviors that are acted out by employees, thus defining the culture. Understanding the relationship between positive attitudes and the likelihood of an employee to make a decision and commit to a purposeful act towards safety will be explored.
