Subject: Snyder Industries, Dominator and NuCon Models, Septic Tank - Acceptance
For Use in Colorado On-site Wastewater Treatment Systems

Dear Mr. Eitzmann:

Pursuant to section 43.13 of the On-site Wastewater Treatment System Regulation 5 CCR 1002-43 (Regulation 43), the Water Quality Control Division (Division) has reviewed drawings and specifications received July 1, 2014, and November 13, 2014, for the following septic tanks:

- Model: Dominator 1000
- Model: Dominator 1250
- Model: Dominator 1500
- Model: NuCon 1050
- Model: NuCon 1250
- Model: NuCon 1500
- Note: All tanks listed above are Double Compartment tanks

The Division finds the tank design to be consistent with the criteria of section 43.9 of Regulation 43. The Division also provides this acceptance of the tank(s) referenced above as meeting these criteria and acceptable for use in Colorado.

The materials reviewed included evidence that the above noted tanks are certified for use as a septic tank by the International Association of Plumbing and Mechanical Officials (IAPMO), so watertightness testing is not required pursuant to section 43.13(G)(2). However, the most up-to-date certification from IAPMO should be provided to the Division upon annual renewal.

This acceptance does not constitute an endorsement of this product. As individual local public health agency regulations may be more stringent than Regulation 43, the Division cannot ensure the acceptance of a septic tank within any given jurisdiction.

If you have any questions regarding the Division's review or findings, please contact me at (303) 692-2366 or chuck.cousino@state.co.us.
