

The Colorado Department of Health Care Policy and Financing is proud to collaborate with other state agencies, federal and local governments and community partners to support Colorado's commitment to become the healthiest state. This commitment is outlined in *The State of Health* plan presented by the Governor's Office in 2013. The plan focuses on four areas: promoting prevention and wellness; expanding coverage, access and capacity; improving health system integration and quality; and enhancing value and strengthening sustainability.

The State of Health Revisited

Department of Health Care Policy
