The Colorado Department of Human Services (CHDS) Office of Behavioral Health (OBH or the Office) understands overlap currently exists between the Colorado Department of Health Care Policy and Financing (HCPF) Uniform Service Coding Standards Manual (HCPF USCS) and the Office of Behavioral Health Substance Use Disorder Uniform Service Coding Standards Manual (OBH SUD USCS). This overlap occurs predominantly with individual code specifics and auditing procedures. In the event of a discrepancy between the two manuals, Mental Health providers shall refer to the HCPF USCS and Substance Use Disorder providers shall refer to the OBH SUD USCS Manual as the primary reference. Additionally, the Office requests that all providers take note of any inconsistencies within reason to aide in streamlining future updates.”
Introduction

The Colorado Department of Human Services (CDHS), Office of Behavioral Health (OBH), is responsible for the administration of service contracts that provide mental health and substance use disorder treatment services to the non-Medicaid populations in Colorado. OBH is responsible for developing performance standards, promulgating rules and regulations, licensing, monitoring, and auditing the public behavioral health system and service providers.

This Substance Use Disorder (SUD) Uniform Service Coding Standards (USCS) Manual was created through a collaborative effort and is designed to supply information to SUD providers that can be easily followed to correctly document and bill for services rendered. The manual is organized according to nine service domains. The service domains are used to encourage consistency and clarity among providers in the provision of SUD treatments. Each service domain is clearly defined and followed by a matrix of relevant procedure codes with service descriptions that will allow providers to easily track and bill SUD services.

Tables are provided to further explain each SUD procedure code. The tables provide important information including the service domain, procedure code, procedure code description, service description, minimum documentation requirements, notes, example activities, applicable populations, place of service, modifier, unit, duration, allowed mode(s) of delivery, and minimum staff requirements.

Purpose

The purpose of the Uniform Service Coding Standards (USCS) Manual for Substance Use Disorders (SUD) is to develop a uniform documenting and reporting system through the Colorado Department of Human Services Office of Behavioral Health and the Department of Health Care Policy and Financing (HCPF), where applicable. A standardized set of substance use disorder codes helps ensure accurate billing and reporting standards. Additionally, this manual will help promote the development of accurate costs of providing direct services and sound reimbursement.
Colorado Substance Use Disorder Services

Service Domains
The manual is organized through uniform service domains to encourage consistency throughout the individual groups of codes and promote clarity through the consistent use of terms. The manner in which these domains are organized reflects the order in which the services are commonly delivered in a practice setting.

Each service domain includes a number of procedures codes for providers to use to track and bill services provided. Prior to the detailed service domain section there is a matrix listing all of the codes for that service domain.

The service domains are:

- Prevention
- Screening
- Assessment
- Intervention
- Social Ambulatory Detoxification
- Treatment
- Case Management
- Support Services
- Room and Board
Covered Diagnoses
The Colorado Department of Human Services (CDHS), Office of Behavioral Health (OBH) identifies covered diagnoses using the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM). The ICD-9-CM is the official system for assigning codes to diagnoses and procedures across all health care settings. ICD-9-CM code selection follows the Official ICD-9-CM Guidelines for Coding and Reporting developed by the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), the Centers for Medicare & Medicaid Services (CMS), and the National Center for Health Statistics (NCHS). These guidelines, while not comprehensive, serve as a companion document to the ICD-9-CM manual. The ICD-9-CM does not include diagnostic criteria or serve as a multi-axial system as its primary function is to define categories that aid in the collection of basic health statistics.

The Diagnostic & Statistical Manual of Mental Disorders, Fourth Edition, Text Revision (DSM-4-TR), was designed with the intention of providing an official nomenclature that is prevalent across all health care environments. The majority of DSM-4-TR diagnoses have numerical ICD-9-CM codes, but some disorders require further definition with subtypes and specifiers. A fifth digit is used when a subtype or specifier is needed. Where either the ICD-9-CM or the DSM-4-TR requires a fifth digit or subtype or specifier, the fifth digit is a placeholder identified with an “x”, indicating the provider should select the appropriate subtype or specifier for accurate diagnostic coding.

Provider Types
Within the substance use disorder provider network, there exists a variety of licensed and non-licensed staff that renders services to clients.

Certified Addiction Counselor (CAC)
A Certified Addiction Counselor (CAC) is a person who has a certificate to practice addiction counseling pursuant to the Colorado Mental Health Practice Act. CAC’s are certified in Colorado at three levels in ascending order of responsibility and requirements:

Certified Assistant Addiction Counselor (CAC I) is an entry-level counselor who may co-facilitate individual or group counseling sessions with a CAC II, CAC III, or LAC; make treatment chart notations co-signed by a CAC II, CAC III, or LAC; and document vital signs in licensed treatment programs. CAC I staff can only account for a maximum of one quarter or 25% of the counseling staff for all licensed programs.

Certified Addiction Counselor (CAC II) is a primary counselor who may independently conduct individual and group counseling sessions and engage in the complete range of therapeutic duties, with the exception of clinical supervision.

Certified Senior Addiction Counselor (CAC III) is a senior counselor who may perform any of the lower-level functions, as well as provide clinical supervision after successful completion of the required clinical supervision training.

Licensed Addiction Counselor (LAC)
A Licensed Addiction Counselor (LAC) is a senior counselor who holds a Master’s degree in the healing arts and is licensed in addiction counseling by the National Association of Alcohol and Drug Abuse Counselors (NAADAC) or the National Board for Certified Counselors (NBCC). An LAC is able to operate independently, as well as provide clinical supervision after successful completion of the required clinical supervision training. In addition, an LAC may supervise other licensed and unlicensed behavioral health professionals. The LAC offers a fourth level of credentialing for addiction professionals comparable to that of other mental health professionals.

Licensed Clinical Social Worker/ Licensed Social Worker (LCSW/LSW)
A Licensed Clinical Social Worker (LCSW) or Licensed Social Worker (LSW) is a person with a Master’s or Doctoral degree from an accredited program offering full-time course work approved by the Colorado Board of Social Work Examiners (CSWE) and who is licensed by the CSWE. Clinical social work practice includes “the practice of social work in addition to the explicit practice of psychotherapy as an LSW. The practice of psychotherapy is “limited to LCSWs or LSWs supervised by LCSWs.”

Scope of Practice: Professional social work practice takes place in public or private agencies or institutional, educational or independent settings and may include, but is not limited to:

- Assessment
- Differential diagnosis
- Treatment planning and evaluation
- Measurement of psychosocial functioning
- Crisis intervention, outreach, short- and long-term treatment
- Therapeutic individual, marital and family interventions
- Client education
- Case management
• Mediation
• Advocacy
• Discharge, referral and continuity of care planning and implementation
• Consultation
• Supervision
• Research
• Management and administration
• Program evaluation and education
• Social group work
• Community organization and development
• Psychotherapy
• Consultation, supervision and teaching in higher education

Licensed Professional Counselor (LPC)
Licensed Professional Counselor (LPC) is a person who possesses a Master’s degree or higher in professional counseling from an accredited college or university, who is licensed by the Colorado Board of Licensed Professional Counselor Examiners to practice professional counseling or mental health counseling.

Scope of Practice: With regard to professional counseling, the LPC’s scope of practice includes:

• “Activities that assist the client in developing an understanding of personal, emotional, social, educational, alcohol and substance abuse, domestic violence and vocational issues, and in planning and effecting actions to increase functioning or gain control of his/her behavior in such areas, including, but not limited to:
  o Skill-building in communications, decision-making, and problem-solving
  o Clarifying values
  o Promoting adaptation to loss and other life changes
  o Developing social skills
  o Restructuring cognitive patterns
  o Defining educational and career goals
  o Facilitating adjustment to personal crises and conflict”

• “The selecting, administering, scoring and interpreting of instruments designed to measure aptitudes, attitudes, abilities, achievements, interests, emotions and other personal characteristics, including the application of non-standardized methods, such as interviews, to evaluate a client’s personal and social functioning.”

• “A voluntary relationship between the counselor and the client in which the counselor assists the client, group or organization to cope with relationships, conflicts, problem-solving, decision-making and competencies by interpreting, reporting on, or applying counseling theory.”

• “Rendering, or offering to render, counseling services that facilitate effective personal, emotional, social, education and vocational development in individuals, couples, groups and organizations, with an emphasis on the natural aspects of human development and with an educational orientation.”

• “Following a planned procedure of interventions that take place on a regular basis, over time, or in the cases of testing, assessment, and brief professional counseling, as a single intervention.”

• With regard to clinical mental health counseling the LPC’s scope of practice includes:
  o “Assessment, counseling activities, consultation, and referral.”
“Treatment, diagnosis, testing, assessment, psychotherapy, or counseling in a professional relationship to assist individuals or groups to alleviate mental and emotional disorders, understand unconscious or conscious motivation, resolve emotional, relationship, or attitudinal conflicts, or modify behaviors that interfere with effective emotional, social, or intellectual functioning.”

**Licensed Marriage and Family Therapist (LMFT)**
A Licensed Marriage and Family Therapist (LMFT) is a person who possesses a Master’s degree or higher from a graduate program with course study accredited by the Commission on Accreditation for Marriage and Family Therapy Education (CAMFTE), who is licensed by the Colorado Board of Marriage and Family Therapist Examiners.\(^{xi}\)

**Scope of Practice:** The LMFT’s scope of practice involves “the rendering of professional marriage and family therapy services to individuals, couples and families, singly or in groups,” utilizing “established principles that recognize the interrelated nature of individual problems and dysfunctions to assess, understand, diagnose and treat emotional and mental problems, alcohol and substance abuse, and domestic violence, and modify intrapersonal and interpersonal dysfunctions.” Professional marriage and family therapy practice includes, but is not limited to:

- Assessment and testing
- Diagnosis
- Treatment planning and evaluation
- Therapeutic individual, marital, family, group or organizational interventions
- Psychotherapy
- Client education
- Consultation
- Supervision\(^{xi}\)

**Licensed Physician (MD/DO)**
A licensed physician is a Doctor of Medicine (MD) or Doctor of Osteopathy (DO) who is licensed by the Colorado Board of Medical Examiners and renders services within the scope of practice of medicine as defined by State law. The licensed physician is also certified in Addiction Psychiatry by the American Board of Psychiatry and Neurology (ABPN) and holds one of the following certifications.

- Certified in Addiction Medicine by American Society of Addiction Medicine (ASAM)
- Certified Level II or III Addiction Counselors (CAC II or CAC III) or Licensed Addiction Counselors (LAC) by the Colorado Department of Regulatory Agencies (DORA) (Refer to Section III.C.)
- Certified by the National Association of Alcohol and Drug Abuse Counselors (NAADAC) as a Nationally Certified Addiction Counselor, Level II (NCAC II) or Master Addiction Counselor (MAC)

**Licensed Non-Physician Practitioner (NPP)**
A Licensed Non-Physician Practitioner (NPP) is any of the following:

- Licensed Addiction Counselor (LAC) (Refer to Section III.C.4.B. of 2012 Uniform Service Coding Standards Manual- HCPF and OBH)
- Licensed Clinical Social Worker (LCSW) (Refer to Section II.C.10.A. of 2012 Uniform Service Coding Standards Manual- HCPF and OBH)
• Licensed Marriage and Family Therapist (LMFT) (Refer to Section II.C.1. of 2012 Uniform Service Coding Standards Manual- HCPC and OBH)
• Licensed Professional Counselor (LPC) (Refer to Section II.C.2. of 2012 Uniform Service Coding Standards Manual- HCPC and OBH)
• Nurse Practitioner (NP) (Refer to Section II.C.4.A. of 2012 Uniform Service Coding Standards Manual- HCPC and OBH)
• Psychologist (PhD) (Refer to Section II.C.3. of 2012 Uniform Service Coding Standards Manual-HCPF and OBH)

These licensed NPPs must also be certified addiction counselors (CACs) with one of the following credentials:

• Certified Level II or III Addiction Counselors (CAC II, CAC III or LAC) by the Colorado Department of Regulatory Agencies (DORA) (Refer to Section III.C.4.A. of 2012 Uniform Service Coding Standards Manual- HCPC and OBH)
• Certified by the National Association of Alcohol and Drug Abuse Counselors (NAADAC) as a Nationally Certified Addiction Counselor, Level II (NCAC II) or Master Addiction Counselor (MAC)

**Addiction Counselors**
The role of the counselor includes a range of knowledge, skills, training, and work experience in the treatment of clients with substance-related disorders that differentiates the addition counselor profession from other health care professionals.

**Peer Specialist**
A Peer Specialist (PS) (also referred to as a Peer Counselor, Peer Mentor) “is a person with a substance use disorder who has been trained “to assist” his/her peers to identify and achieve specific life goals.”

Peer Specialists perform a wide variety of tasks to assist clients “in regaining control over their own lives and recovery process.” Peer Specialists assist clients “in navigating the substance use disorder services system and in achieving resiliency and recovery as defined by the person.” Peer Specialists “promote self-determination, personal responsibility and the empowerment inherent in self-directed recovery.” Peer Specialists provide peer support services, serve as client advocates, and provide client information for clients in emergency, outpatient or inpatient settings. As individuals who experience mental illness themselves, Peer Specialists “model competency in recovery and maintaining ongoing wellness.”

**LPN/LVN**
A Licensed Practical Nurse (LPN) or Licensed Vocational Nurse (LVN) is a person who has graduated from an approved program of practical nursing, and holds a license as a Practical Nurse from the Colorado Board of Nursing.

**Scope of Practice:** The LPN/LVN’s scope of practice is the performance, under the supervision of a Physician or Professional Nurse licensed by the State, “of those services requiring the education, training and experience, as evidenced by the knowledge, abilities and skills” required for licensure, “in caring for the ill, injured or infirm, in teaching and promoting preventive health measures, in acting to safeguard life and health, or in administering treatments and medications” prescribed by a legally authorized Physician or Physician Assistant (PA) implementing a medical plan of care.
Psych. Tech
A Psychiatric Technician (Psych Tech) (also referred to as a Psychiatric Aide, Trained Psychiatric Technician, or Graduate Psychiatric Technician) is a person who performs specific duties under the direction of a licensed Physician (MD/DO) and the supervision of an RN.xx

Scope of Practice: The Psych Tech’s scope of practice involves functions “requiring interpersonal and technical skills,” including:

- Administering “selected treatments and medications (oral medications and hypodermic injectionsxix) prescribed by a licensed Physician (MD/DO)”
- Care and observation of clients with mental illness (MI) or developmental disability (DD)
- Recognition of symptoms and reactions of a client with MI or DDxxii

Registered Nurse (RN)
A Registered Nurse (RN) or Registered Professional Nurse (RPN) is a person who has graduated from an approved program of professional nursing, and is licensed as a Professional Nurse by the Colorado Board of Nursing.xxiii

Scope of Practice: The RN’s scope of practice entails “the performance of both independent nursing functions and delegated medical functions in accordance with accepted practice standards.”xxiv

- Functions include:
  - “Initiation and performance of nursing care through health promotion”
  - “Supportive or restorative care”
  - “Disease prevention”
  - “Diagnosis and treatment of disease, ailment, pain, injury, deformity and physical or mental condition using specialized knowledge, judgment and skill involving the application of biological, physical, social and behavioral science principles”

- Services include:
  - “Evaluating health status through collection and assessment of health data”
  - “Health teaching and health counseling”
  - “Providing therapy and treatment that is supportive and restorative to life and well-being, either directly to the client or indirectly through consultation with, delegation to, supervision of, or teaching of others”
  - “Executing delegated medical functions”
  - “Referring to medical or community agencies those clients who need further evaluation and/or treatment”
  - “Reviewing and monitoring therapy and treatment plans”xxv

Registered Nurse with Prescriptive Authority (RxN)
An Advanced Practice Nurse with Prescriptive Authority (RxN) is a Professional Nurse licensed by the Colorado Board of Nursing, who has been granted recognition on the Advanced Practice Registry (APR) in at least one (1) role and specialty, and who has been granted Prescriptive Authority by the Colorado Board of Nursing.xxvi
Scope of Practice: The RxN’s scope of practice is determined by the Colorado Board of Nursing, and “is limited to prescribing only those prescription medications and controlled substances that are appropriate for treating patients within the RxN’s area of practice.” The RxN works under “a written collaborative agreement with a Physician licensed by the State whose medical education, training, experience and active practice correspond with that of the RxN.” The RxN may accept, possess, administer and dispense medication, including samples, “for routine health maintenance, routine preventive care, an acute self-limiting condition, the care of a chronic condition that has stabilized, or terminal comfort care,” within the limits of his/her prescriptive authority.xxvii

Advanced Practice Registered Nurse (APRN)
An Advanced Practice Nurse (APN) is a Professional Nurse licensed by the Colorado Board of Nursing, “who obtains specialized education and/or training,” and who been recognized and included on the Advanced Practice Registry (APRN) by the Colorado Board of Nursing. APN roles recognized by the Colorado Board of Nursing include:

- Nurse Practitioner (NP)
- Certified Registered Nurse Anesthetist (CRNA)
- Certified Nurse Midwife (CNM)
- Clinical Nurse Specialist (CNS)

Scope of Practice: The APN’s scope of practice “is founded on the specialized education or training acquired by the Professional Nurse in preparation for advanced practice.” “It is within the independent scope of advanced practice nursing to order diagnostic testing, treatment and other nursing services.”xxviii

Unlicensed EdD/PhD/PsyD
An Unlicensed Psychotherapist is “any person whose primary practice is psychotherapy,” “who is not licensed” by the Colorado Board of Psychologist Examiners, the Colorado Board of Social Work Examiners, the Colorado Board of Licensed Professional Counselor Examiners, or the Colorado Board of Marriage and Family Therapist Examiners “to practice psychotherapy.”xxxii Unlicensed Psychotherapists are not “authorized to practice outside of or beyond his/her area of training, experience or competence.”xxx However, Unlicensed Psychotherapists who are employees of community mental health centers (CMHCs) are not required to be registered in the State Grievance Board database.xxxi

Certified Prevention Specialist
A Certified Prevention Specialist is credentialed by the Colorado Prevention Certification Board, working under strict guidelines set by the International Certification & Reciprocity Consortium (IC&RC). Certified Prevention Specialist must receive the certification and this program is deal for therapists, social workers, counselors, HR staff, educators, youth service providers, law enforcement, military officers, community advocates, faith based leaders, and prevention specialists for nonprofit organizations.

Licensed Psychologist (EdD/PhD/PsyD)
A Licensed Psychologist is a person with a Doctoral degree (EdD, PhD, PsyD) in clinical or counseling psychology from an accredited program offering psychology courses approved by the American Psychological Association (APA), who is licensed by the Colorado Board of Psychologist Examiners.xxxii

Scope of Practice: The Licensed Psychologist’s scope of practice entails “the observation, description, evaluation, interpretation, treatment or modification of behavior, cognitions or emotions by the
application of psychological, behavioral and physical principles, methods or procedures, for the purpose of preventing or eliminating symptomatic, maladaptive or undesired behavior, cognitions or emotions, and of enhancing interpersonal relationships, work and life adjustment, personal effectiveness, behavioral health and mental health. Psychologists use any and all psychological principles, methods and devices to consider the full range of possible causes of patients’ illnesses, and then select and apply the appropriate treatment methods.” Psychological services may be rendered to individuals, families, groups, organizations, institutions, the public, and/or the courts. The practice of psychology includes, but is not limited to:

- “Psychological testing and evaluation or assessment of personal characteristics, such as intelligence, personality, abilities, interests and aptitudes”
- “Neuropsychological tests, assessments, diagnoses and treatment of neuropsychological and brain disorders”
- “Psychotherapy, including psychoanalytic, existential, cognitive and behavioral therapies, hypnosis and biofeedback”
- “Clinical and counseling psychology, including the diagnosis and treatment of mental, neurological, psycho- physiological and emotional disorder(s) or disability(ies), alcoholism and substance abuse, behavioral abuse (including dangerousness to self or others) and disorders of habit or conduct”
- “Rehabilitation psychology, dealing with the psychological aspects of physical illness, accident, injury or disability and rehabilitation”
- “Health psychology, dealing with the role of psychological factors in health and illness”
- “Forensic psychology, dealing with the relation and application of psychological research and knowledge to legal issues, including but not limited to, assessments of competency in civil or criminal matters, legal questions of sanity, or civil commitment proceedings”
- “Organizational psychology, including assessment and intervention by an employee within his/her organization or by a consultant retained by the organization”
- “Community psychology, emphasizing prevention and early discovery of potential difficulties, rather than awaiting initiation of therapy by affected individual or groups, which is generally practiced outside of an office setting”
- “Psychological evaluation, therapy, remediation, and consultation”
- “Research psychology, applying research methodologies, statistics and experimental design to psychological data”

Nurse Practitioner (NP)
A Nurse Practitioner (NP) is a non-physician medical practitioner that is a licensed registered nurse (RN) legally entitled to use the title of nurse practitioner. Nurse practitioners predominantly practice “primary care” after completing a clinical and didactic program of at least six months’ duration, which is appropriate to the scope and function of the practitioner’s area of expertise.

Physician Assistant (PA)
A Physician Assistant (PA) is a person who has successfully completed an education program for PAs and the national certifying examination for PAs, and is licensed by the Colorado Board of Medical Examiners.

Scope of Practice: The PA renders delegated medical functions under the direction and supervision of a Physician licensed and practicing in the State of Colorado.
Qualified Medication Administration Person (QMAP)
A Qualified Medication Administration Person (QMAP) is a person who has successfully completed a State-approved medication administration training course. A QMAP is employed by a licensed facility on a contractual, full- or part-time basis to provide direct care services, including medication administration to residents upon written order of a licensed physician or other licensed authorized practitioner. A QMAP may also be a person employed by a home health agency who functions as permanent direct care staff to licensed facilities, who is trained in medication administration, and who administers medication only to the residents of the licensed facility.xxxvi

Scope of Practice: Successful completion of a State-approved medication administration course qualifies a QMAP to administer medications in settings authorized by law. Such settings include:

- Correctional facilities under the supervision of the Executive Director of the Department of Corrections (DOC), including but not limited to:
  - Minimum security facilities
  - Jails
  - Community correctional facilities and programs
  - Regimented inmate discipline and treatment program
  - Denver Regional Diagnostic Center (DRDC)
- Institutions for juveniles
- Assisted living residences
- Adult foster care facilities
- Alternative care facilities
- Residential childcare facilities
- Secure residential treatment centers
- Residential facilities providing treatment for persons with mental illnesses, except for facilities that are publicly or privately licensed hospitals
- Services for persons with developmental disabilities (DD) funded and regulated by the Colorado Department of Human Services (CDHS)
- State certified adult day programs xxxvii

“Successful completion of a State-approved medication course does not lead to certification or licensure,” nor does it “allow the person to make any type of judgment, assessment or evaluation of a client.” QMAPs may not “administer medication by injection or tube,” or “draw insulin or other medication into syringes.”xxxviii A QMAP may administer medications by the following routes of administration:

- Oral
- Sublingual
- Topical
- Eye
- Ear
- Rectal
- Vaginal
- Inhalant
- Trans-dermalxxxix
Treatment Facility

Treatment facilities are licensed by the Colorado Department of Human Services (CDHS), Office of Behavioral Health (OBH) based on Substance Use Disorder Treatment Rules (2006). These treatment rules govern the provision of treatment to persons with substance-related disorders.
**Place of Service (POS)**

Place of service (POS) codes are two digit codes used on health care professional claims to specify where a service was rendered. These POS codes are used throughout the healthcare industry and are maintained by the Centers for Medicare & Medicaid Services (CMS). POS information is needed to determine the acceptability of direct billing of Medicare, Medicaid, and private insurance services rendered by a given provider.
<table>
<thead>
<tr>
<th>Code</th>
<th>POS Name</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>3</td>
<td>School</td>
<td>A facility whose primary purpose is education.</td>
</tr>
<tr>
<td>4</td>
<td>Homeless Shelter</td>
<td>A facility or location whose primary purpose is to provide temporary housing to homeless individuals (e.g., emergency shelters, individual or family shelters).</td>
</tr>
<tr>
<td>9</td>
<td>Prison/ Correctional Facility</td>
<td>A prison, jail, reformatory, work farm, detention center, or any other similar facility maintained by either federal, State or local authorities for the purpose of confinement or rehabilitation of adult or juvenile criminal offenders.</td>
</tr>
<tr>
<td>11</td>
<td>Office</td>
<td>Location, other than a hospital, skilled nursing facility (SNF), military treatment facility, community health center (CHC), State or local public health clinic, or intermediate care facility (ICF), where the health professional routinely provides health examinations, diagnosis, and treatment of illness or injury on an ambulatory basis.</td>
</tr>
<tr>
<td>12</td>
<td>Home</td>
<td>Location, other than a hospital or other facility, where the patient receives care in a private residence.</td>
</tr>
<tr>
<td>13</td>
<td>Assisted Living Facility</td>
<td>Congregate residential facility with self-contained living units providing assessment of each resident’s needs and on-site support 24-hours a day, 7 days a week, with the capacity to deliver or arrange for services, including some health care and other services.</td>
</tr>
<tr>
<td>14</td>
<td>Group Home</td>
<td>A residence, with shared living areas, where clients receive supervision and other services, such as social and/or behavioral services, custodial service, and minimal services (e.g., medication administration).</td>
</tr>
<tr>
<td>15</td>
<td>Mobile Unit</td>
<td>A facility/unit that moves from place-to-place equipped to provide preventive, screening, diagnostic, and/or treatment services.</td>
</tr>
<tr>
<td>16</td>
<td>Temporary Lodging</td>
<td>A short-term accommodation, such as a hotel, camp ground, hostel, cruise ship or resort where the patient receives care, and which is not identified by any other POS code.</td>
</tr>
<tr>
<td>20</td>
<td>Urgent Care</td>
<td>A location, distinct from a hospital emergency room, an office or a clinic, whose purpose is to diagnose and treat illness or injury for unscheduled, ambulatory patients seeking immediate medical attention.</td>
</tr>
<tr>
<td>23</td>
<td>Emergency Room – Hospital</td>
<td>A portion of a hospital where emergency diagnosis and treatment of illness or injury is provided.</td>
</tr>
<tr>
<td>24</td>
<td>Ambulatory Surgical Center</td>
<td>A free-standing facility, other than a physician’s office, where surgical and diagnostic services are provided on an ambulatory basis.</td>
</tr>
<tr>
<td>26</td>
<td>Military Treatment Facility (MTF)</td>
<td>A medical facility operated by one or more of the Uniformed Services. MTF also refers to certain former US Public Health Service (USPHS) facilities now designated as Uniformed Service Treatment Facilities (USTF).</td>
</tr>
<tr>
<td>Code</td>
<td>Facility Type</td>
<td>Description</td>
</tr>
<tr>
<td>------</td>
<td>----------------------------------------</td>
<td>-----------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>31</td>
<td>Skilled Nursing Facility (SNF)</td>
<td>A facility which primarily provides inpatient skilled nursing care and related services to patients who require medical, nursing or rehabilitative services, but does not provide the level of care or treatment available in a hospital.</td>
</tr>
<tr>
<td>32</td>
<td>Nursing Facility</td>
<td>A facility which primarily provides to residents skilled nursing care and related services for the rehabilitation of injured, disabled or sick persons, or on a regular basis health-related care services above the level of custodial care to other than individuals with mental retardation (MR).</td>
</tr>
<tr>
<td>33</td>
<td>Customer Care</td>
<td>A facility which provides room, board and other personal assistance services, generally on a long-term basis, and which does not include a medical component.</td>
</tr>
<tr>
<td>34</td>
<td>Hospice</td>
<td>A facility, other than a patient’s home, in which palliative and supportive care for terminally ill patients and their families are provided.</td>
</tr>
<tr>
<td>49</td>
<td>Independent Clinic</td>
<td>A location, not part of a hospital and not described by any other POS code, that is organized and operated to provide preventive, diagnostic, therapeutic, rehabilitative, or palliative services to outpatients only.</td>
</tr>
<tr>
<td>50</td>
<td>Federally Qualified Health Center (FQHC)</td>
<td>A facility located in a medically underserved area that provides Medicare beneficiaries preventive primary medical care under the general direction of a physician.</td>
</tr>
<tr>
<td>51</td>
<td>Inpatient Psychiatric Facility</td>
<td>A facility that provides inpatient psychiatric services for the diagnosis and treatment of mental illness on a 24-hour basis, by or under the supervision of a physician.</td>
</tr>
<tr>
<td>52</td>
<td>Psychiatric Facility – Partial Hospitalization</td>
<td>A facility for the diagnosis and treatment of mental illness that provides a planned therapeutic program for patients who do not require full-time hospitalization, but who need broader programs than are possible from outpatient visits to a hospital-based or hospital-affiliated facility.</td>
</tr>
<tr>
<td>53</td>
<td>Community Mental Health Center (CMHC)</td>
<td>A facility that provides the following services: outpatient services, including specialized outpatient services for children, the elderly, individuals who are chronically ill, and residents of the CMHC’s mental health services area who have been discharged from inpatient treatment at a mental health facility; 24-hours a day emergency care services; day treatment, other partial hospitalization services, or psychosocial rehabilitation services; screening for patients being considered for admission to State mental health facilities to determine the appropriateness of such admission; and consultation and education services.</td>
</tr>
<tr>
<td>54</td>
<td>Intermediate Care Facility – Mentally Retarded (ICF-MR)</td>
<td>A facility which primarily provides health-related care and services above the level of custodial care to individuals with MR, but does not provide the level of care or treatment available in a hospital or SNF.</td>
</tr>
<tr>
<td>Code</td>
<td>Service Description</td>
<td>Description</td>
</tr>
<tr>

<td>Rural Health Clinic</td>
<td>A certified facility which is located in a rural medically underserved area that provides ambulatory primary medical care under the general direction of a physician.</td>
</tr>
<tr>
<td>99</td>
<td>Other Place of Service</td>
<td>Other place of service (POS) not identified above.</td>
</tr>
</tbody>
</table>
Procedure Code Modifiers

Procedure code modifiers are designed to allow providers to more accurately document and report the services rendered. The two digit modifiers are appended to the Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) procedure codes to indicate that a rendered service or procedure has been altered in its delivery by some specific circumstance, but has not changed in its definition or procedure code. Modifiers are used when the information supplied by a procedure code descriptor needs to be supplemented to identify specific circumstances, or to provide additional information, that may apply to a service or item, including but not limited to:

- Service/procedure was increased/reduced
- Mandated service/procedure
- Credentials/training of the provider
- Unusual event(s) occurred

Modifiers are classified as either a payment modifier which may affect reimbursement, or as an information modifier which will not affect reimbursement. Up to four modifiers may be used for each procedure code. CPT and HCPCS modifiers may be appended to either CPT or HCPCS procedure codes. When supplementing with both payment and informational modifiers, the payment modifiers are sequenced first, in order of relative importance.
**CPT Modifiers**

CPT modifiers are two-digit numeric codes listed after a procedure code and separated from the procedure code by a hyphen. Not all of the 31 total CPT modifiers are applicable to substance abuse treatment services, so on the modifiers that are potentially useful to substance abuse providers are listed in the table below.

<table>
<thead>
<tr>
<th>CPT Modifiers</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>22 Increased Procedural Services</td>
<td>Used when the work necessary to render a service or procedure is substantially greater than typically required. Documentation must support the substantial additional work and the reason for the additional work (i.e., increased intensity, time, technical difficulty of procedure, severity of client’s condition, and/or physical and mental effort required).</td>
</tr>
<tr>
<td>52 Reduced Services</td>
<td>Used, in certain circumstances, to signify that a component of a service or procedure has been partially reduced or eliminated, at the provider’s discretion. This modifier provides a means for documenting and reporting reduced services or procedures without disturbing the identification of the basic procedure code. Documentation must support the service, and the reduction or elimination of any component, with a brief explanation or clarifying statement.</td>
</tr>
</tbody>
</table>
**HCPCS Modifiers**

HCPCS Level II modifiers are two-digit alpha or alphanumerical codes listed after a procedure code and separated from the procedure code by a hyphen. Not all 394 total HCPCS Level II modifiers are applicable to substance abuse treatment services, so only the modifiers that are potentially useful to providers are included in the table below. For reporting and billing purposes, all Medicaid outpatient substance abuse (SA) treatment services are identified by using the modifier HF (Substance Abuse Program). Special Connections, the Medicaid reimbursed services for Pregnant Women, uses HD as the first modifier.

</tr>
</tbody>
</table>
**Procedure Codes**

**Prevention**

Prevention services are targeted towards individuals before they develop an alcohol and/or drug use disorder. Prevention programs promote constructive lifestyles and norms that discourage alcohol and/or drug usage. Prevention services utilize a variety of strategies, including screening and outreach services that identify at-risk populations, proactive efforts to educate and empower individuals to choose and maintain healthy behaviors, and lifestyle choices that promote positive behavioral health choices. Services may be population based and can be provided through media, written formats, peer groups, or through group interventions. These services are not restricted to face-to-face modes of delivery. Prevention services can include any of the following: mental health screenings; nurturing parent programs; educational programs (safe and stable families); senior workshops (common aging disorders); “Love and Logic” (healthy parenting skills); and CASASTART (children at high risk for substance abuse [SA], delinquency, and academic failure).

### SERVICE DESCRIPTION

Training provided to support staff and personnel (not directly employed by a provider) on topics related to alcohol, tobacco and/or other drug services of which that person could be directly involved with providing to a client.

#### MINIMUM DOCUMENTATION REQUIREMENTS

- Date of service
- Start and stop time (duration)
- Number of participants
- Type of service

### NOTES

Training could include educating personnel on any of the following:

- Infectious diseases (AIDS/HIV, Hepatitis C, TB), including universal precautions against becoming infected
- Monitoring vital signs
- Conducting assessment and triage, including identifying suicidal ideation
- Emergency procedures and their implementation
- Collecting urine, and breath samples
- Cultural factors that impact detoxification
- Clinical ethics and confidentiality
- Clinical records systems
- De-escalating potentially dangerous situations
- Basic counseling and motivational interviewing skills
- Additional skills or services needed to treat alcohol, tobacco, and other drug disorders

### APPLICABLE POPULATION(S)

- Child (0-11)
- Adolescents (12-17)
- Young Adult (18-20)
- Adult (21-64)
- Geriatric (65+)

### PLACE OF SERVICE (POS)

CPT ®/HCPCS PROCEDURE CODE | PROCEDURE CODE DESCRIPTION
--- | ---
H0025 | Behavioral health prevention education service (delivery of services with target population to affect knowledge, attitude and/or behavior)

**SERVICE DESCRIPTION**

Services delivered to target audiences with the intent of affecting knowledge, attitude and/or behavior. Education involves two-way communication and is distinguished from information dissemination by the fact that interaction between educator/facilitator and participants is the basis of the activities.

**MINIMUM DOCUMENTATION REQUIREMENTS**

- Number of participants
- Type of service

**NOTES**

Activities affect critical life and social skills, including but not limited to decision-making, refusal skills, critical analysis, and systematic judgment abilities.

**EXAMPLE ACTIVITIES**

- Classroom educational activities
- Education services for youth
- Parenting/family management services
- Peer leader/helper programs
- Small group sessions

**APPLICABLE POPULATION(S)**

- Child (0-11)
- Adol (12-17)
- Young Adult (18-20)
- Adult (21-64)
- Geriatric (65+)

</tr>
</thead>
<tbody>
<tr>
<td>H0028</td>
<td>Alcohol and/or drug prevention problem identification and referral service (e.g. student assistance and employee assistance programs), does not include assessment</td>
</tr>
</tbody>
</table>

### Service Description

Alcohol and/or drug prevention problem identification and referral services include screening for tendencies toward substance abuse and referral for preventive treatment for curbing such tendencies if indicated. This service is provided to address the following risk factors: individual attitudes towards substance use, and perceived risks for substance use. Identification and referral programs look at the relationship between substance use and a variety of other problems such as mental health problems, family problems, sexually transmitted diseases, school or employment failures and delinquency.

### Minimum Documentation Requirements

- Date of service
- Start and stop time (duration)
- Number of participants
- Type of service
- Referral to treatment if necessary

Screening

Screening can consist of two separate activities, depending upon its purpose. When used as a part of treatment, screening services are often performed through specimen collection to test for the presence of alcohol and/or drugs. Results are discussed with the client during a substance abuse counseling session. If reimbursed by Medicaid, alcohol and drug screenings are limited to 36 specimen collections in a State fiscal year.

Screening is also used to identify individuals whose substance use may put them at increased risk for health problems or other substance use related problems. Providers use a screening tool to obtain information about a client’s substance use behaviors, which assists providers in identifying people who may need further assessment of their substance use and related issues. Screenings often provide patients with personal feedback about their increased risks due to substance use and may identify problems that can prompt individuals to change their substance use behavior.

</tr>
<tr>
<td>CPT */HCPCS PROCEDURE CODE</td>
</tr>
<tr>
<td>---------------------------</td>
</tr>
<tr>
<td>80101</td>
</tr>
</tbody>
</table>

**SERVICE DESCRIPTION**

This procedure screens for drugs using a single drug class laboratory analyzer, such as an immunoassay technique or an enzyme assay. Drug screening is used to determine the appropriate treatment for an individual at a particular treatment facility prior to administering differential assessments. Personnel collecting and or performing laboratory analysis on collected specimens must follow established laboratory procedures to prevent contamination and ensure chain of custody.

**MINIMUM DOCUMENTATION REQUIREMENTS**

- Date of service
- Client consent
- Screening results
- Client’s identified treatment plan (if applicable)
- Referral for treatment (if applicable)
- Signed with 1st initial, last name & credentials

**NOTES**

This procedure code is used once per screening for each drug class assessed, but this code is not to be used for drug testing kits that evaluate multiple drug classes in a single procedure. Use code H0048 for collection specimens. If reimbursed by Medicaid, 36 specimen limit per year. Modifier HG only applies for opioid testing.

**EXAMPLE ACTIVITIES**

An immunoassay is a biochemical test that measures the presence and or concentration of a substance in a solution that often contains a complex mixture of substances. Enzyme assays measure either the consumption of a substrate or production of a product over time. An example substance could be an opioid compound.

**APPLICABLE POPULATION(S)**

**SERVICE DESCRIPTION**

“Specimen Collection” means the collection and handling of hair, saliva, or urine for the purposes of analysis for the presence of alcohol and/or other drugs, and **does not include** the laboratory analysis of such specimens. Appropriate and approved samples for drug testing shall be collected and analyzed in accordance with applicable state and federal statutes and regulations, and OBH rules, policies and procedures.

**MINIMUM DOCUMENTATION REQUIREMENTS**

- Date of service
- Screening results
- Signed with 1st initial, last name & credentials

**NOTES**

**EXAMPLE ACTIVITIES**

Staff collecting urine, breath, and blood samples shall be knowledgeable of collection, handling, recording and storing procedures assuring sample viability for evidentiary and therapeutic purposes. If reimbursed by Medicaid screening is limited to thirty-six (36) specimens per State FY. Modifier HG only applies for opioid testing.

Assessment
The assessment process helps to determine the nature and extent of a person’s difficulties with substances. Assessment instruments collect and clinicians evaluate information about a client in order to develop a profile that is used for service planning and referrals to treatment. An assessment instrument is considered to be a diagnostic tool used to gather the necessary information about a client during an assessment process. If reimbursed by Medicaid assessments are limited to three sessions per State fiscal year.

**Intervention**

Intervention services provide advice or counseling to individuals with minor or risky substance use disorders, and are also used to encourage individuals with a serious dependence problem to seek or accept a more intensive treatment regimen. Brief interventions can be provided within a primary care setting or screeners can refer someone to a specialized alcohol and/or drug treatment program. An intervention is an activity used to assist patients with recognizing that substance use is putting them at risk and to encourage them to change their behavior in order to reduce or discontinue their substance use.

#### SERVICE DESCRIPTION

Hotline Services are provided through a program with telephone support services that are available twenty-four (24) hours per day, seven (7) days per week. Callers often call a hotline anonymously during a crisis situation. There is no requirement for the caller to become a client of the hotline program.

**Social Ambulatory Detoxification**

Social Ambulatory Detoxification services are rendered to clients whose intoxication or withdrawal signs and / or symptoms are severe enough to require a 24-hour structured program. These services are not provided to clients that require hospitalization for their intoxication or withdrawal symptoms. Medicaid reimbursed services are provided on a residential basis by a facility that is licensed by the Colorado Department of Human Services (CDHS), Office of Behavioral Health (OBH) based on the American Society of Addiction Medicine (ASAM) criteria. These services do not include room and board. Social/Ambulatory Detoxification Services may include any of the following: a physical assessment of detoxification progression (i.e., vital signs monitoring); a safety assessment (i.e., suicidal ideation [SI] and other behavioral health [BH] issues); a level of motivation assessment for treatment evaluation; or the provision of daily living needs (i.e., hydration, nutrition, cleanliness, and toiletry). Other rehabilitative substance abuse treatment services are not reimbursed on the same date of service. If reimbursed by Medicaid Social/Ambulatory Detoxification is limited to 12 units per day, not to exceed seven days per State fiscal year.

Detoxification in a non-Medicaid reimbursed facility can be provided in a facility greater than 16 beds.

**SERVICE DESCRIPTION**

Medically monitored inpatient sub-acute detoxification for alcohol and or drug services conducted in a licensed health care or addiction treatment facility. Individuals receive face-to-face interactions to medically manage and monitor withdrawal symptoms (including severe physical and psychological symptoms) that require medical management with medications and 24 hour medical care from medical professionals. The program shall be staffed with the appropriate personnel to meet the needs of residents 24 hours per day.

**MINIMUM DOCUMENTATION REQUIREMENTS**

- Date of service
- Start and stop time (Duration)
- Admission criteria
- Patient informed consent
- Medical evaluations and monitoring activities
- Protocols for usual and customary detoxification (individualized detoxification plan)
- Discharge planning
- Signed with 1st initial, last name & credentials

**NOTES**

Service should be provided for a minimum of 24 Hours. A treatment Facility providing this service should have a maximum of 25% of its staff with, or working towards, a CAC I certification.

**EXAMPLE ACTIVITIES**

- Safe withdrawal
- Motivational counseling
- Referral for treatment
- Additional service planning, as required, for managing clients with medical conditions, suicidal ideation, pregnancy, psychiatric conditions, and other conditions, which place clients at additional risk during detoxification.1
- Assessment(s) of client readiness for treatment
- Clinical interventions based on service plan
- Admission documentation
- All detox monitoring (including vital signs taken at least every 2 hours until remaining in normal range for at least 4 hours; then every 8 hours until discharge)
- Routine monitoring of physical and mental status
- Discharge information communicated to client (effects of AOD, risk factors associated with AOD abuse for HIV/AIDS, TB and other infectious diseases, and pregnancy; information about availability of testing and pre-/post-test counseling for HIV/AIDS, TB, Hep C and other infectious diseases, and pregnancy; and the availability of AOD treatment services)

</tbody>
</table>

**SERVICE DESCRIPTION**
Provided through face-to-face interactions with an individual for the purpose of medically managing and monitoring withdrawal symptoms from alcohol and/or drug addiction as an outpatient through a residential addiction program with appropriate accreditation, certification, and licensure. The program shall be staffed with a sufficient number of personnel on a 24-hour per day basis to meet the health care needs of the residents served by personnel trained, authorized, and credentialed (where applicable) to carry out assigned job responsibilities consistent with scopes of practice, resident population characteristics and the resident’s individual plan of care/treatment.

- Date of service
- Start and stop time (duration)
- Admission criteria
- Patient informed consent including date and time
- Medical evaluations
- Protocols for usual and customary detoxification (individualized detoxification plan)
- Discharge planning and procedures (information shall be communicated to the patient about the effects of alcohol and drugs; risk factors associated with alcohol and drug abuse such as acquiring or transmitting HIV/AIDS; availability of testing and counseling for HIV/AIDS, TB, Hepatitis C, other infectious diseases, and pregnancy; availability of alcohol and drug abuse treatment services).
- Signed with 1st initial, last name & credentials

**NOTES**
A treatment Facility providing this service should have a maximum of 25% of its staff with, or working towards, a CAC I certification. Non-hospital environments: require a client/staff ratio that does not exceed 10 to one (10:1) and each shift requires a minimum of (2) staff members. This code is for non Medicaid eligible clients.

**EXAMPLE ACTIVITIES**
Unless staffed with medical personnel – Medical evaluations cannot be completed.
- Safe withdrawal
- Motivational counseling
- Referral for treatment
- Additional service planning, as required, for managing clients with medical conditions, suicidal ideation, pregnancy, psychiatric conditions, and other conditions, which place clients at additional risk during detoxification.¹

<tr>
<th>CPT ®/HCPCS PROCEDURE CODE</th>
<th>PROCEDURE CODE DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>T1007</td>
<td>Physical assessment of detoxification progression including vital signs monitoring</td>
</tr>
</tbody>
</table>

#### SERVICE DESCRIPTION

- A treatment plan development and or modification-means there is a design or modification of the treatment or service plan for substance use disorders. This may be the initial plan for a client beginning treatment or the modification of a plan for a client already in treatment. It is typically a scheduled service that is not necessarily delivered in conjunction with another treatment. This service may require the participation of clinicians and specialists in addition to those usually providing treatment.
- **Date of service**
- **Start and stop time (duration)**
- **Assessment of detox progression**
  - Degree of AOD intox as evidenced by breathalyzer, UA, self-report, observation or other accepted means
  - Initial vital signs
  - Need for emergency medical and/or psychiatric services
  - Current state of substance abuse disorders, including drug types and amounts
  - Substance use disorder history and degree of personal and social dysfunction, as soon as clinically feasible
  - Pregnancy screen
  - Clinical Institute Withdrawal Assessment of Alcohol – Revised (CIWA-AR) or comparable instrument
- **Detox monitoring**
  - All monitoring activities
  - Vital signs taken at least every 2 hours until remaining normal range for at least 4 hours; than every 8 hours until discharge
  - Routine monitoring of physical and mental status
- **Medical interventions based on assessment and monitoring**
- **Signed with 1st initial, last name & credentials**

#### MINIMUM DOCUMENTATION REQUIREMENTS

- At least fifty percent (50%) of detoxification staff including on-call staff shall consist of Certified Addiction Counselors or staff in the process of obtaining certification. Plans for certification shall be available for review. Full-time staff shall obtain at least a CAC I within 18 months of employment. The staff person overseeing day-to-day operations shall be certified as a CAC III.

#### NOTES

- Another example of the services provided in a social model detox

Treatment

Treatment services utilize a variety of methods to treat mental, behavioral, and substance use disorders. The goal is to alleviate emotional disturbances and reverse or change maladaptive patterns of behavior in order to encourage a client’s personal growth and development. Treatment services often utilize assessments to formulate and implement an individualized comprehensive written treatment plan that is used to promote the client’s highest possible level of independent functioning. Treatment can include relapse planning, information about the process of addiction, and assist clients to understand some of the underlying issues that lead them to use substances.

### SERVICE DESCRIPTION
A therapeutic, prophylactic/diagnostic injection for the administration of medications.

- Date of Service (DOS)
- Administration time
- Client demographic information
- Written physician order (required)
- Injection site
- Medication administered
- Provider administering injection
- Signed with 1st initial, last name & credentials

### NOTES
This code may be used in a clinic/CMHC, even if client brings in the medication to be administered. Pharmacies cannot bill for the administration of drugs in a practitioner’s office/clinic. Injectable drugs intended for self-administration/use in the client’s home/ administration for a client in a LTC facility may be billed by a pharmacy.

#### SERVICE DESCRIPTION

**Office or other outpatient visit** for the evaluation and management of a new patient, which required these 3 key components:
- An expanded problem focused history;
- An expanded problem focused examination; and
- Straightforward medical decision making.

#### MINIMUM DOCUMENTATION REQUIREMENTS

- Date of service
- Start and stop time (duration)
- Specifically document time with patient (i.e. 20 of the 50 minutes was used counseling and coordinating care)
- Reason for encounter and relevant history, physical examination findings and prior diagnostic tests
- Assessment, clinical impression/diagnosis
- Outcome/plan
- Past and present diagnoses
- Appropriate health risk factors
- Patient’s progress, response to and changes in treatment, and revision in diagnosis if applicable
- Counseling and/or activities performed to coordinate patient care
- Provider’s dated signature, degree, title/position

#### EXAMPLE ACTIVITIES

Counseling and/or coordination of care with other physicians, other qualified health care professionals, or agencies are provided consistent with the nature of the problems(s) and the patient’s and/or family’s needs. Usually the presenting problems(s) are of low to moderate severity. Typically, **20 minutes** are spent face-to-face with the patient and/or family.

#### APPLICABLE POPULATION(S)

<th>CPT ®/HCPCS PROCEDURE CODE</th>
<th>PROCEDURE CODE DESCRIPTION</th>
</tr>
</thead>
<tbody>
<tr>
<td>H0038</td>
<td>Self Help/Peer Services, per 15 minutes</td>
</tr>
</tbody>
</table>

#### Service Description

This is a scheduled therapeutic activity lead by a trained client who is self identified as receiving behavioral health services. Activities should encourage hope, wellness, recovery, self-advocacy, and socialization while promoting a natural support system and skills that are necessary to build a positive community. Activities could assist clients with obtaining meaningful employment, relapse prevention planning, or with developing and or strengthening personal skills that are necessary for recovery.

#### Minimum Documentation Requirements

- Date of service
- Start and stop time (duration)
- Client demographic information
- Service provided
- Client’s response
- Client’s progress towards treatment goals
- Signed with 1st initial, last name & credentials

#### Notes

These are peer counselor/mentor/specialist rendered and facilitated activities.

- Advocacy
- Recovery groups
- Peer-run employment services
- Peer counseling and support services
- Peer mentoring for children and adolescents

#### Example Activities

**SERVICE DESCRIPTION**

Individualized, community-based clinical interventions, delivered as an alternative/adjunct to traditional services. Services may include informal, natural supports and resources provided to a child/adolescent and family members to promote, maintain/restore successful community living. Services are delivered in non-traditional manners/places based on a collaborative planning process. Services are intended to help stabilize and strengthen the placement of the child/adolescent.

**MINIMUM DOCUMENTATION REQUIREMENTS**

- Date of service
- Start and stop time (duration)
- Client demographic information
- Related to treatment/service plan goals and objectives
- Description of service rendered, POS, and others involved
- Interventions and interactions between provider and client, with client’s response
- Rationale for activity selected, expectations, and outcome
- Recommendations
- Signed with 1st initial, last name & credentials

**NOTES**

Community-based wrap-around services up to 4 hours (16 units) is reported/billed as H2021

**SERVICE DESCRIPTION**

A brief one-on-one session in which concerns about a client’s AOD use are expressed, and advice regarding behavior change is given. The intervention usually follows immediately after a client has been screened for the presence of AOD. Feedback is given on AOD use patterns. The intervention focuses on increasing motivation for behavior change. Intervention strategies include education, simple advice, brief counseling, continued monitoring, or referral to more intensive substance abuse treatment services.

**MINIMUM DOCUMENTATION REQUIREMENTS**

- Date of service
- Start and stop time (duration)
- Results of AOD screening
- Feedback given
- Intervention strategies utilized
- Client response
- Outcome/plan
- Signed with 1st initial, last name & credentials

**NOTES**

Substance abuse counseling services shall be provided along with screening to discuss results with client.

**EXAMPLE ACTIVITIES**

- Substance abuse counseling services
- Services shall be provided along with screening to discuss results with client.

**Case Management**

Case Management services are provided through a licensed substance use disorder treatment program. These services help clients gain access to necessary medical, social, educational, and other necessary services. Services may include any of the following: assessment of an eligible individual; development of a specific care plan; referral to services; and monitoring and follow-up activities, and benefits acquisition and maintenance.

## Effective July 1st, 2013

**Uniform Service Coding Standards Manual**

### Substance Use Disorder  Page 99

Services rendered to assist and support a client in gaining access to or to develop his/her skills for gaining access to needed medical, social, educational, and other services essential to meeting basic human needs, as appropriate. Monitoring progress and overall service delivery. Targeted Case Management (TCM) includes: **Assessing service needs** (client history, ID client needs, completing related documents, gathering information from other sources); **Service plan development** (specifying goals and actions to address client needs, ensuring client participation, identifying course of action); **Referral** and related activities to obtain needed services (arranging initial appointments for client with service providers or informing client of services available, addresses and telephone numbers of agencies providing services; working with client and/or service providers to secure access to services, including contacting agencies for appointments/services after initial referral process); **Monitoring and follow-up** (contacting client/others to ensure client is following the agreed upon service plan and monitoring progress and impact of plan).

If reimbursed by Medicaid, targeted Case Management is limited to 36 contacts per state fiscal year. Services may include service planning, advocacy and linkage to other medical services related to substance abuse diagnosis, monitoring, and care coordination.

TCM may include contacts with non-eligible individuals that are directly related to identifying the needs and supports necessary to help the eligible client access services. TCM does not include the direct delivery of an underlying medical, educational, social or other service to which an eligible client has been referred. TCM does not include time spent transporting the client to required services or time spent waiting while the client attends a scheduled appointment.

### Applicable Population(s)

- Child (0-11)

Support
Support services provide choices, assistance, and opportunities to individuals with substance use disorders. Services that target an individual’s recovery will promote the self-management of psychiatric symptoms, prevent relapses, provide treatment choices, offer mutual support, offer enrichment, and promote the protection of one’s rights. Support services will provide social supports and a lifeline for individuals having difficulties stemming from substance abuse disorders. Recovery services are generally provided by behavioral health peers or family members in addition to licensed counselors.

H2034
Halfway house

In-home behavioral health support for clients living in a halfway house to foster the client’s development of independence and eventually move to independent living. The client has the opportunity to live in a less restrictive living situation while continuing to receive BH treatment, training, support, and a limited amount of supervision.

- Date of service
- Start and stop time (duration)
- Client demographic information
- Shift notes
- Consent for emergency medical treatment
- Client program orientation form
- Sign with 1st initial, last name & credentials

Discrete services (e.g., family, group and individual psychotherapy, psychiatric services, case management, etc.) are documented, and reported or billed separately from H2034.

Procedure Coding Best Practices
Coding consistency is a major initiative in the quest to improve quality reporting and accurate claims submission for substance use disorder (SUD) services. Adherence to industry standards and approved coding principles ensure quality along with consistency in the reporting of these services. Ensuring accuracy of coding is a shared responsibility among all substance use disorder (SUD) practitioners. Through coding accuracy, behavioral health organizations (BHOs), community mental health centers (CMHCs), substance use disorder providers and other community-based practitioners, are able to measure standards of care, assess quality outcomes, manage business activities, and receive timely reimbursement. This section provides an overview of best practice guidance for coding substance use disorder (SUD) services.

Clinical Coding Systems
The clinical coding systems currently used in the United States are the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) and the Healthcare Common Procedure Coding System (HCPCS). These clinical coding systems are used by the Department of Health Care Policing and Financing (HCPF) for both the Colorado Medicaid Community Mental Health Services Program and the Colorado Medical Assistance Program (MAP) and by the Colorado Office of Behavioral Health.

- **ICD-9-CM** is the official system of assigning codes to diagnoses and procedures used by all health care settings, including hospitals, physicians, nursing homes (NHs), home health agencies and other providers. ICD-9-CM procedure codes are used to collect hospital inpatient procedural data. ICD-9-CM code selection follows the *Official ICD-9-CM Guidelines for Coding and Reporting*, developed cooperatively by the American Hospital Association (AHA), the American Health Information Management Association (AHIMA), the Centers for Medicare & Medicaid Services (CMS), and the National Center for Health Statistics (NCHS). These guidelines are a companion document to the ICD-9-CM, and while not exhaustive, assist the user in situations where the ICD-9-CM does not provide direction. The ICD-9-CM is updated annually, effective October 1st.

The procedure codes contained in this Uniform Service Coding Standards Manual are part of the Healthcare Common Procedure Coding System (HCPCS). HCPCS is the standardized coding system for describing the supplies and services provided in the delivery of health care. Use of HCPCS codes was voluntary until the implementation of Health Insurance Portability and Accountability Act (HIPAA), when the use of HCPCS codes for health care information transactions became mandatory. HCPCS currently includes two levels of codes:

- **HCPCS Level I** consists of the *Current Procedural Terminology (CPT®), Fourth Edition*, a numeric coding system maintained by the American Medical Association (AMA). The CPT® is a uniform coding system comprised of descriptive terms and more than 8,000 codes used to identify medical services and procedures rendered by physicians and other health care professionals. CPT® code selection follows the guidelines set forth in the current CPT® manual and in the AMA CPT® Assistant newsletters. The CPT® is updated annually by the AMA CPT® Editorial Panel, effective January 1st.

- **HCPCS Level II** (commonly referred to as HCPCS) is a standardized alphanumeric (a single alphabetical letter followed by four numeric digits) coding system used to describe and identify equipment, supplies, and services not included in the Level I (CPT®) codes. HCPCS code selection follows the guidelines set forth by CMS in *HCPCS Level II Coding Procedures*. The more than
8,000 Level II codes are maintained and revised by CMS annually, effective January 1st, with quarterly updates.

These clinical coding systems serve an important function for provider reimbursement, hospital payments, quality review, benchmarking measurement, and the collection of general statistical data. Current and updated ICD-9-CM, CPT® and HCPCS Level II code books are an invaluable resource used by all professionals assigning procedure codes, and thus a printed and/or electronic copy of the coding manuals should be available for reference by qualified staff. For additional detailed information and guidance, providers are strongly encouraged to refer to the most recently published editions of the standardized manuals for each procedure code set.

**Responsibility for Code Assignments**

The ultimate responsibility for procedure code assignment lies with the rendering behavioral health (BH) services provider. Policies and procedures may document instances where procedure codes may be selected and assigned by authorized individuals (e.g., coders), who may change a procedure code to more accurately reflect the provider’s documentation. However, collaboration with the provider is required, as the provider is ultimately responsible for the coding and documentation.

**General Procedure Coding Requirements**

The following are general procedure coding requirements that are applicable to behavioral health organizations (BHOs), community mental health centers (CMHCs), and substance abuse (SA) treatment service providers:

- Instructions for payer-specific (e.g., Medicaid, Medicare, third party insurance) procedure coding requirements should be readily accessible to all staff. These instructions should also be regularly reviewed and updated as needed to accurately reflect current payer-specific standards.

- Specific and detailed procedure coding guidelines should be utilized to report all services to payers. These guidelines should also be regularly reviewed and updated as needed.

- All clinicians should interpret clinical documentation and apply procedure coding principles in the same manner.

According to the American Medical Association (AMA) Current Procedural Terminology (CPT®) instructions, providers should “select the name of a procedure that accurately identifies the service performed. Do not select a CPT® code that merely approximates the service provided.” When an “accurate” procedure code does not exist to describe the service or procedure, the provider should do one (1) of the following:

1. Use an unlisted CPT® procedure code (e.g., 90899) and include a “special report” as supporting documentation

2. Append a CPT® procedure code with an appropriate modifier (e.g., 22, 52)

3. Use an appropriate Healthcare Common Procedure Coding System (HCPCS) procedure code
Procedure codes should not be assigned, modified, or excluded solely for maximizing reimbursement.

For reporting and/or billing purposes, the clinical record documentation should always precede the CPT® or HCPCS procedure code(s) selection. The following steps, in sequential order, are essential to the process of rendering, documenting, and reporting or billing behavioral health (BH) services:

1. Determine that the service or procedure is medically necessary.
2. Render the service or procedure needed to meet the client’s needs.
3. Document the service rendered in the clinical record.
4. Select the most appropriate CPT® or HCPCS procedure code for the service or procedure.
5. Report the service or procedure encounter, or submit a claim for the service or procedure rendered.xlviii

Clinical service or procedure codes should not be changed or amended due to a provider’s or client’s request to have the service in question covered by a payer.

If the initial procedure code assignment does not reflect the actual service(s), procedure codes may be revised based on supporting documentation.

Procedure coding references, BHO- and/or CMHC-specific guidelines, and regulatory requirements outlining reporting procedures should be readily accessible to all staff. These documents should also be regularly reviewed and updated as needed.

Correcting Inaccurate Code Assignments & Processing Claim Rejections

Each behavioral health organization (BHO), community mental health center (CMHC), and substance abuse (SA) treatment service provider should have a defined written procedure for correcting inaccurate code assignments, both in the clinical record (electronic or hard copy) and with the payer and/or agency to whom the code is reported. In the event an error is discovered after claim submission, a correction should be facilitated on a claim amendment and re-submitted with appropriate documentation, following the payer-specific instructions. Additionally, all rejected claims pertaining to diagnosis and procedure codes should be reviewed and corrected promptly (within one (1) week).

Coding Audits

Audits are generally performed for two (2) reasons:

- **Revenue reasons** – To ensure that the provider is properly reporting and/or billing services or procedures
- **Compliance reasons** – To ensure that the provider is only reporting and/or billing the services or procedure renderedxlix

Audits can provide a wide variety of information, including but not limited to:
• Incorrect levels of service
• Under- and over-coding
• Improper use of modifiers
• Compliance concerns
• Comparison of coding patterns and trends
• Documentation/electronic health record (EHR) issues

While the Office of the Inspector General (OIG) recommends that providers should, at a minimum, audit at least five (5) progress notes every year, many coding professionals recommend auditing more frequently and with more records to ensure that the parameters for accurate coding are being met. Standard audits should be performed at least quarterly. A minimum of thirty (30) random records per provider per year. Target audits should be performed for specific areas of concern based on the standard audit. The audit frequency and scope of review should be determined according to behavioral health organization (BHO), community mental health center (CMHC), and/or substance abuse (SA) treatment service provider policies and procedures, as applicable. For example, standard audits that reveal a high level of accuracy may not need to be done as frequently, whereas audits that uncover an unusual level of variance may need to be done more frequently in order to identify the root cause of the exception [note this requires a footnote reference]. Audit results should be reported to leadership, compliance staff, and providers. Data from the audit process should be used by management to provide the information necessary for relevant changes and data quality improvements.

Data Quality
Inaccurate and/or missing data poses increased challenges for data quality, which in turn affects client care. While various information networks are developing and implementing information exchange networks, data accuracy and quality often becomes an issue.

Consequently, data quality affects statistical reporting and reimbursement. When data is improperly coded or does not meet coding compliance, it not only affects the client, but also the submitting or billing provider. By maximizing coding efforts, data quality will improve and ultimately increase the quality of client care.
Client privacy is also a critical issue in a network environment. Data inaccuracy is propagated to other data sets, systems and warehouses. Data errors can compromise personal health information (PHI). Practicing accurate data quality by focusing on errors and initiating corrections promptly maintains compliance, as well as cost effectiveness.

It is critical to address data quality issues by reviewing areas for improvement and developing strategies to minimize inaccurate data. The behavioral health organizations (BHOs), community mental health centers (CMHCs), and substance abuse (SA) treatment service providers should continue to develop cultures of data consciousness and quality.

**Coding Code of Ethics**

Standards of ethical coding are relevant to individuals responsible for coding and to individuals responsible for overseeing the medical coding process. Ethical coding standards are designed to assist coders with making decisions while facing ethical challenges in the workplace. There are several national professional coding organizations that place an emphasis on ethical coding:

- The American Academy of Professional Coders (AAPC) online at www.aapc.com
- The American College of Medical Coding Specialists (ACMCS) online at www.acmcs.org
- The American Health Information Management Association (AHIMA) online at www.ahima.org

One example of a coding code of ethics is supplied by the AHIMA. The AHIMA Standards of Ethical Coding (http://library.ahima.org/xpemia/groups/public/documents/ahima/bok2_001166.hcsp?dDocName=bok2_001166) state that coding professionals should:

1. “Apply accurate, complete, and consistent coding practices for the production of high-quality healthcare data.

2. Report all healthcare data elements (e.g., diagnosis and procedure codes, present on admission indicator, discharge status) required for external reporting purposes (e.g., reimbursement and other administrative uses, population health, quality and patient safety measurement, and research) completely and accurately, in accordance with regulatory and documentation standards and requirements and applicable official coding conventions, rules, and guidelines.

3. Assign and report only the codes and data that are clearly and consistently supported by health record documentation, in accordance with applicable code set and abstraction conventions, rules, and guidelines.

4. Query providers (e.g., physician or other qualified healthcare practitioner) for clarification and additional documentation prior to code assignment when there is conflicting, incomplete, or ambiguous information in the health record regarding a significant reportable condition or procedure or other reportable data element dependent on health record documentation (e.g., present on admission indicator).

5. Refuse to change reported codes or the narratives of codes so that meanings are misrepresented.
6. Refuse to participate in or support coding or documentation practices intended to inappropriately increase payment, qualify for insurance policy coverage, or skew data by means that do not comply with Federal and State statutes, regulations and official rules and guidelines.

7. Facilitate interdisciplinary collaboration in situations supporting proper coding practices.

8. Advance coding knowledge and practice through continuing education.

9. Refuse to participate in or conceal unethical coding or abstraction practices or procedures.

10. Protect the confidentiality of the health record at all times and refuse to access protected health information not required for coding-related activities (examples of coding-related activities include completion of code assignment, other health record data abstraction, coding audits, and educational purposes).

11. Demonstrate behavior that reflects integrity, shows a commitment to ethical and legal coding practices, and fosters trust in professional activities.”
Requesting Procedure Code Revisions

There are three processes interested parties can follow to request a procedure code revision, one of these is only used if the revision applies to the current Colorado Department of Human Services (CDHS), Office of Behavioral Health (OBH) Uniform Coding Standards (USCS) Manual for Substance Use Disorders (SUD), while the other two processes are used if a suggested revision should be implemented at the national level.

If a suggested revision is applicable to this manual, then interested parties should contact the OBH and provide a brief statement with referenced material explaining the rationale for adding, deleting, or modifying one or more suggested Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) procedure code(s). The statement should also include the following information:

- Current approved CPT/HCPCS procedure code, if applicable
- Suggested CPT/HCPCS procedure code(s) and description(s)
- Service description
- Minimum documentation requirements
- Notes, if applicable
- Example(s), if available
- Applicable modifier(s), populations, mode(s) of delivery, and place(s) of service (POS)
- Units of service (days, hours, minutes, or encounters)
- Durations (minimum and maximum), if applicable
- Minimum staff requirements

OBH will review and discuss suggested procedure code revisions with the appropriate SUD stakeholders. If a recommendation is accepted, then a revised list of approved procedure codes will be distributed to the appropriate SUD providers and treatment facilities along with an updated Uniform Coding Standards (USCS) Manual for Substance Use Disorders (SUD).

If a suggested revision is applicable at the national level, then a request should be submitted to the American Medical Association (AMA), for CPT procedure codes, or through the Centers for Medicare & Medicaid Services (CMS), for HCPCS procedure codes. The AMA and CMS have formal procedures that must be followed when requesting procedure code revisions, additions, and / or deletions; these procedures are briefly described in this section.
CPT Procedure Code Revisions
The American Medical Association (AMA) requires interested parties to follow a specific process in order to submit a revision to the set of Current Procedural Terminology (CPT) procedure codes. For additional information on the CPT procedure coding revision process or to obtain an application interested parties may:

- Request Forms from the AMA online (www.ama-assn.org)

HCPCS Procedure Code Revisions
The Centers for Medicare & Medicaid (CMS) also require interested parties to follow a specific process in order to submit a revision to the Healthcare Common Procedure Coding System (HCPCS) codes. For additional information on the HCPCS procedure coding revision process or to obtain an application interested parties may:

- Review and access documents online at www.cms.gov/medhcpcsgeninfo
- Submit inquiries to HCPCS@cms.hhs.gov

Special Connections

Special Connections is a substance use disorder treatment program for pregnant women that is funded by Medicaid and is jointly managed by the Department of Health Care Policy and Financing (HCPF) and the Colorado Department of Human Services (CDHS), Office for Behavioral Health (OBH). The goal of the program is to help facilitate a healthy pregnancy and post-partum period for at-risk women and their infants. The program offers assessment services, individual and group therapies, care coordination and case management services, health education services and residential services. Assessments are performed by certified drug/alcohol treatment counselors. The assessment is designed to determine the level of drug and/or alcohol abuse or dependence, and the comprehensive treatment needs of a drug/alcohol abusing pregnant client. Clients eligible for the Special Connections program must be medically verified as pregnant and be at risk of a poor birth outcome and in need of special assistance in order to reduce the risk. Authorization to provide services is managed by the Office of Behavioral Health (OBH), which contracts for direct services with appropriately licensed treatment programs.

The Office of Behavioral Health (OBH) is the only entity to receive reimbursement for assessments and drug/alcohol treatment services provided to program-enrolled clients. This allows the Special Connections program to monitor for program quality and to audit billing information for quality control purposes. All treatment bills are reconciled against billing information provided by the Department of Health Care Policy and Financing (HCPF).

#### NOTES

Special Connections services are available to Medicaid-eligible pregnant women who begin their enrollment with the program while they are still pregnant. Special Connections clients are eligible for services through this program until they are 12 months post-partum, assuming continued Medicaid eligibility. HD is only used during pregnancy.

#### EXAMPLE ACTIVITIES

Referring a current client to a residential treatment program (making sure she gets there) and obtaining benefits on behalf of the client.

Appendix B

Screening, Brief Intervention and Referral to Treatment (SBIRT) Program

Screening, Brief Intervention and Referral to Treatment (SBIRT) is a comprehensive, integrated public health approach to the delivery of early intervention and treatment services for persons who are at high risk of developing substance use disorders, as well as those who have already developed such disorders. Primary care centers, hospital emergency rooms, trauma centers, and other community settings provide opportunities for early intervention with at-risk substance users before more severe consequences occur. Screening and intervention services are designed for early detection and intervention to prevent members from developing a substance abuse disorder. These services are not intended to treat individuals who are already diagnosed with a substance abuse disorder or those who are already receiving substance abuse treatment services. SBIRT services are not designed to address smoking and tobacco cessation services unless it is a co-occurring diagnosis.

The codes used to report SBIRT services were introduced during the annual American Medical Association (AMA) PCT Symposium in November 2007 and became effective on January 1, 2008 and have consistent reimbursement tiers across all levels of providers. Screening and Brief Intervention services lasting for fifteen (15) to thirty (30) minutes are billed using CPT code 99408 or HCPCS code H0049. Screening and Brief Intervention services lasting longer than thirty (30) minutes are billed using CPT code 99409 or HCPCS code H0050. SBIRT services that do not meet the minimum fifteen (15) minute threshold are not separately reimbursable. It is important to note these are time based codes and thus documentation must denote stop and start times or the total amount of time spent with the client. When billing for a SBIRT service, providers may submit for reimbursement using either the CPT or HCPCS codes, but not both codes together.

Prior to conducting screening and brief intervention, providers may conduct a brief screen or pre-screen consisting of several short validated questions related to the client’s substance use. A brief or pre-screen is designed to determine if a full screen is necessary. Brief pre-screens are not covered services.

Typical components include:

- The use of a standardized screening tool;
- The patient receives feedback concerning the screening results;
- Discussion of negative consequences of substance use and the overall severity of the problem;
- Motivating the patient toward behavioral change;
- A joint decision-making process regarding alcohol and/or drug use; and
- Plans for follow up are discussed and agreed to with the client.

All licensed individuals must be trained through a minimum of four (4) hours of SBIRT specific training in order to provide or supervise individuals receiving SBIRT services. All non-licensed individuals must also receive formal training in addition to being under the direct supervision of a SBIRT services provider. In addition, unlicensed individuals must document a minimum of sixty (60) hours of professional experience such as coursework, internship, practicum, education or professional work within their respective field. This experience should include a minimum of four (4) hours of training that is directly related to Screening, Brief Intervention and Referral to Treatment services. Additionally, unlicensed individuals must document a minimum of thirty (30) hours of face-to-face client contact within their respective field. This may include internships, on the job training, or professional experience. This contact may include, but
Ancillary staff and health educators may perform SBIRT services under the supervision of a credentialed provider. The services must relate to a plan of care and require billing under the credentialed provider. Providers are required to retain documentation concerning the health care professional’s education, training, and supervision for provision of SBIRT services.

**Intervention Requirements**

For any Colorado Medical Assistance Program client, the intervention services are limited to four (4) hours per rolling twelve (12) months, which means that over an eleven (11) month period, a total of four (4) hours of intervention can be billed. A unit of service is fifteen (15) minutes, so the four (4) hour limit is equal to sixteen (16) units of intervention services that may be provided per patient, per day for a total of sixteen (16) units per client under the Mental Health and Substance Abuse Screening benefit. Intervention services may be provided on the same date or a later date than the screening.

<td>H0049</td>
</tr>
</tbody>
</table>

**SERVICE DESCRIPTION**

Brief intervention means a provider interaction with a client that is intended to induce a positive change in a health-related behavior. Follow-up intervention means services to reassess a client’s status, assess progress and promote or sustain a reduction in substance use. Follow-up services may also be used to assess a client’s need for additional services. Full screen means the use of a Colorado Medicaid approved evidence-based screening tool to identify clients at risk for substance abuse problems.

**MINIMUM DOCUMENTATION REQUIREMENTS**

- Date of service
- Start and stop time (duration)
- Diagnosis Code V82.9
- Place of service
- Results of screen/outcomes
- Referral for treatment (if necessary) and recommendations going forward
- Signed with 1st initial, last name & credentials

**NOTES**

This code is for use by non-Federally Qualified Health Centers. If you bill this code you cannot also bill for 99408 or 99409. Health Educators must perform services under the direct supervision of a credentialed provider & documents should be co-signed.

SBIRT services are covered for risky substance use or abuse including alcohol and drugs. Tobacco use alone is not an SBIRT benefit. Tobacco must be co-occurring with another substance such as drug or alcohol.

**APPLICABLE POPULATION(S)**

- Child (0-11)  ✔  Adoles (12-17)  ✔  Young Adult (18-20)  ✔  Adult (21-64)  ✔  Geriatric (65+)

**PLACE OF SERVICE (POS)**

**SERVICE DESCRIPTION**

Brief intervention means a provider interaction with a client that is intended to induce a positive change in a health-related behavior. Brief intervention may include an initial intervention, a follow-up intervention and/or a referral. Brief screens and pre-screens are non-covered services.

- Date of service
- Start and stop time (duration)
- ICD-9-CM Diagnosis Code V65.42
- Place of service
- Procedure code (CPT)
- Results of screen/outcomes
- Referral for treatment and recommendations going forward (if indicated)
- Sign with 1st initial, last name

**MINIMUM DOCUMENTATION REQUIREMENTS**

- Brief intervention services may be provided on the same date of services as the full screen, or on subsequent days. The Brief Intervention shall be limited to two (2) sessions per client per state fiscal year. Each session is limited to 2 units per session at 15 minutes per unit.
- To report intervention under the SBIRT benefit the appropriate diagnosis is V65.42, Other counseling, Substance Use and Abuse. This code is for use by non-Federally Qualified Health Centers. If you bill this code you cannot also bill for 99408 or 99409.
- SBIRT services are covered for risky substance use or abuse including alcohol and drugs. This code is intended to be used following a positive screen on H0049.

**APPLICABLE POPULATION(S)**

- Child (0-11)
- Young Adult (18-20)
- Adult (21-64)
- Geriatric (65+)

**PLACE OF SERVICE (POS)**

Nursing Board Policy #30-05: Overview of the Scope of Practice of Advanced Practice Nursing. Denver, CO: State Board of Nursing.

“...special exemption in the law that authorizes individuals trained and employed in residential or day program services for persons with developmental disabilities (DD) to administer medications through gastrostomy or naso-gastric tubes. These residential and day program services must be provided through service agencies approved by the Colorado Department of Human Services (CDHS).” See Colorado Department of Public Health & Environment (DPHE), Health Facilities & Emergency Medical Services Division (May, 2009). Medication Administration Video Handbook. Denver, CO: DPHE, page 2.
