Subject: San Luis Valley Precast, Septic Tank - Acceptance
For Use in Colorado On-site Wastewater Treatment Systems

Dear Mr. Weaver:

Pursuant to section 43.13 of the On-site Wastewater Treatment System Regulation 5 CCR 1002-43 (Regulation 43), the Water Quality Control Division (Division) has reviewed drawings and specifications received March 21, 2016 and April 14, 2016, for the following septic tanks:

- 1,000 Gallon, 1,250 Gallon and 1,500 Gallon, Del Zotto Low Profile 2-opening septic tank
- 1,000 Gallon, 1,250 Gallon and 1,500 Gallon, Del Zotto Low Profile 3-opening septic tank
- 1,000 Gallon, 1,250 Gallon and 1,500 Gallon, Del Zotto Low Profile 3-opening grease interceptor
- 500 Gallon Del Zotto single compartment septic tank
- Note: All tanks are double compartment unless otherwise noted

The Division finds the tank design to be consistent with the criteria of section 43.9 of Regulation 43. The Division also provides this acceptance of the tank(s) referenced above as meeting these criteria and acceptable for use in Colorado.

Note: Pursuant to section 43.13(G)(2), at least five percent of tanks must be tested for watertightness at the manufacturing facility. A summary of testing results must be submitted to the Division on an annual basis (by February 15, each calendar year). The testing results submittal form is available on the Division website.

This acceptance does not constitute an endorsement of this product. As individual local public health agency regulations may be more stringent than Regulation 43, the Division cannot ensure the acceptance of a septic tank within any given jurisdiction.

If you have any questions regarding the Division's review or findings, please contact me at (303) 692-2366 or chuck.cousino@state.co.us.

Sincerely,

Charles J. Cousino, REHS
