CATEGORICAL EXCLUSION DETERMINATION FOR THE PROPOSED WASTEWATER PROJECT FOR LARIMER COUNTY LOCAL IMPROVEMENT DISTRICT NO. 2013-1 (BERTHOUD ESTATES)

The Water Quality Control Division of the Colorado Department of Public Health and Environment has conducted a review of the proposed drinking water project for the LARIMER COUNTY LOCAL IMPROVEMENT DISTRICT NO. 2013-1 (BERTHOUD ESTATES) in accordance with Environmental Protection Agency (EPA) and State of Colorado procedures for implementing the National Environmental Policy Act (NEPA) (40 CFR Part 6) and the State of Colorado NEPA-like policy (SRF Operating Agreement). The State has determined that this project is eligible for a categorical exclusion. Accordingly, the State is exempting the project from further substantive environmental review requirements under the above stated policies.

Project Description:

The proposed project consists of replacing the existing aerated lagoon waste water treatment system with a new sequencing batch reactor treatment plant and appurtenances, sludge removal and relining of lagoon #3 for use as emergency overflow storage, and demolition of the remaining existing lagoon facility. The project will in part be funded by a Water Pollution Control Revolving Fund loan in the amount of \$1,045,900.08 at an interest rate of 2%. The project will increase the user rates by \$30.51 per month.

Criteria for Granting a Categorical Exclusion under 40 CFR part 6.204:

The action proposed will ensure compliance with current and future wastewater treatment standards. The following criteria condition the allowance of the categorical exclusion for the proposed action:

- Minor rehabilitation of existing facilities,
- Functional replacement of equipment,
- Construction of new ancillary facilities either adjacent or appurtenant to existing facilities which do not affect the degree or capacity of treatment, and
- Minor upgrades and expansions of existing treatment works in sewerred communities

The documentation to support this decision will be on file at the Colorado Department of Public Health and Environment, Water Quality Control Division, in Denver, Colorado, and is available for public scrutiny upon request. Comments concerning this decision may be addressed to:
