CATEGORICAL EXCLUSION DETERMINATION FOR THE PROPOSED DRINKING WATER PROJECT FOR FOREST VIEW ACRES WATER DISTRICT

The Water Quality Control Division of the Colorado Department of Public Health and Environment has conducted a review of the proposed drinking water project for the Forest View Acres Water District in accordance with Environmental Protection Agency (EPA) and State of Colorado procedures for implementing the National Environmental Policy Act (NEPA) (40 CFR Part 6) and the State of Colorado NEPA-like policy (SRF Operating Agreement). The State has determined that this project is eligible for a categorical exclusion. Accordingly, the State is exempting the project from further substantive environmental review requirements under the above stated policies.

Project Description:

The proposed project consists of replacing distribution lines and meters, and installing new hydrants. The project will be funded by a Drinking Water Revolving Fund loan in the amount of \$500,000 at an interest rate of 2 percent. The project will not increase monthly user rates.

The project, by design, will not increase the drinking water for the planning area.

Criteria for Granting a Categorical Exclusion under 40 CFR part 6.204:

The action proposed will ensure compliance with current and future drinking water treatment standards. The following criteria condition the allowance of the categorical exclusion for the proposed action:

- Functional replacement of equipment;
- Construction of additional facilities adjacent to existing facilities which do not affect the degree or capacity of treatment by more than 30 percent of the existing populations;
- Distribution line replacement.

The documentation to support this decision will be on file at the Colorado Department of Public Health and Environment, Water Quality Control Division, in Denver, Colorado, and is available for public scrutiny upon request. Comments concerning this decision may be addressed to:
