

**FINDING OF NO SIGNIFICANT IMPACT**

TO ALL INTERESTED GOVERNMENTAL AGENCIES AND PUBLIC GROUPS:  
As required by guidelines for the preparation of environmental impact statements, an environmental review has been performed on the proposed action below:

Project: Town of Larkspur

Location: Douglas County, Colorado

Project No.: 960061D

Total Cost: \$3,300,000

**Project Description**

This Finding of No Significant Impact (FNSI) is being republished with an addition to the original project description. The original project included drilling a new well, constructing a new water storage tank, expanding a pump station, and replacing the existing pump, iron and manganese removal system, and pressure valve. The project will now also include new distribution lines. The project is partly funded through the Drinking Water Revolving Fund in the amount of \$2,000,000 at an interest rate of 0%, and a principal forgiveness loan in the amount of \$847,920. The overall project will increase the user rates by \$38.58 per month.

The review process did not indicate that significant environmental impacts would result from the proposed action. Consequently, a preliminary decision not to prepare an Environmental Impact Statement (EIS) has been made. The action is taken on the basis of a careful review of the engineering report, environmental assessment, and other supporting data that are on file in the Water Quality Control Division of the Colorado Department of Public Health and Environment, and are available for public review upon request.

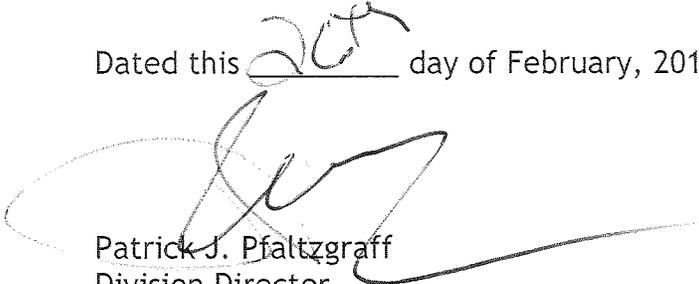

Comments supporting or disagreeing with this decision may be submitted for consideration to:

Margaret Pauls, Project Manager  
Colorado Department of Public Health and Environment  
WQCD-GLU-B2  
4300 Cherry Creek Drive South  
Denver, CO 80246-1530

After evaluation of the comments received, the Division will make a final decision; however, no administrative decision will be taken on the project for at least 30 calendar days after publication of the Finding of No Significant Impact.

Dated this 20<sup>th</sup> day of February, 2016.

Patrick J. Pfaltzgraff  
Division Director  
Water Quality Control Division
