

COLORADO

Department of Public
Health & Environment

Dedicated to protecting and improving the health and environment of the people of Colorado

FINDING OF NO SIGNIFICANT IMPACT

TO ALL INTERESTED GOVERNMENTAL AGENCIES AND PUBLIC GROUPS:

As required by guidelines for the preparation of environmental impact statements, an environmental review has been performed on the proposed action below:

Project: Pinery Water and Wastewater District

Location: Douglas County, Colorado

Project No.: 140310D

Total Cost: \$14,250,066

Project Description

The proposed project consists of a new pump station, treatment building, and new water lines connecting the new and existing pump stations. The project will be funded by a Drinking Water Revolving Fund loan in the amount of \$14,250,066 at an interest rate of 2.07%. The project is not anticipated to require an increase in the existing monthly user rates.

The review process did not indicate that significant environmental impacts would result from the proposed action. Consequently, a preliminary decision not to prepare an Environmental Impact Statement (EIS) has been made. The action is taken on the basis of a careful review of the engineering report, environmental assessment, and other supporting data that are on file in the Water Quality Control Division of the Colorado Department of Public Health and Environment, and are available for public review upon request.

Comments supporting or disagreeing with this decision may be submitted for consideration to:

Margaret Pauls, Project Manager
Colorado Department of Public Health and Environment
WQCD-GLU-B2
4300 Cherry Creek Drive South
Denver, CO 80246-1530

After evaluation of the comments received, the Division will make a final decision; however, no administrative decision will be taken on the project for at least 30 calendar days after publication of the Finding of No Significant Impact.

Dated this 18 day of March, 2016.

Patrick J. Pfaltzgraff
Division Director
Water Quality Control Division
