

Dedicated to protecting and improving the health and environment of the people of Colorado

**CATEGORICAL EXCLUSION DETERMINATION
FOR THE PROPOSED DRINKING WATER PROJECT FOR
THE TOWN OF GRANBY FOR MORAINÉ PARK**

The Water Quality Control Division of the Colorado Department of Public Health and Environment has conducted a review of the proposed drinking water project for the Town Of Granby for Moraine Park in accordance with Environmental Protection Agency (EPA) and State of Colorado procedures for implementing the National Environmental Policy Act (NEPA) (40 CFR Part 6) and the State of Colorado NEPA-like policy (SRF Operating Agreement). The State has determined that this project is eligible for a categorical exclusion. Accordingly, the State is exempting the project from further substantive environmental review requirements under the above stated policies.

Project Description:

The proposed project consists of the replacement of an inadequate water distribution system within the Moraine Park Subdivision, an unincorporated subdivision adjacent to the Town of Granby.

The project will be funded by a Drinking Water Revolving Fund loan in the amount of \$741,524. Upon closing of the loan, 100% of the principal amount will be forgiven, and the project will not increase user rates. The project, by design, will not increase the drinking water demand for the planning area.

Criteria for Granting a Categorical Exclusion under 40 CFR part 6.204:

The action proposed will ensure compliance with current and future drinking water treatment standards. The following criteria condition the allowance of the categorical exclusion for the proposed action:

- Minor rehabilitation of existing facilities.
- Functional replacement of equipment.
- Construction of additional facilities adjacent to existing facilities which do not affect the degree or capacity of treatment by more than 30 percent of the existing populations.
- Distribution line replacement.
- Minor upgrades and expansions of existing water systems in communities of 10,000 population or less (distribution line extensions are not included).

The documentation to support this decision will be on file at the Colorado Department of Public Health and Environment, Water Quality Control Division, in Denver, Colorado, and is available for public scrutiny upon request. Comments concerning this decision may be addressed to:
