CATEGORICAL EXCLUSION DETERMINATION FOR THE PROPOSED DRINKING WATER PROJECT FOR THE TOWN OF CROWLEY

The Water Quality Control Division of the Colorado Department of Public Health and Environment has conducted a review of the proposed drinking water project for the Town of Crowley in accordance with EPA and the State of Colorado procedures for implementing the National Environmental Policy Act (NEPA) (40 CFR Part 6) and the State of Colorado NEPA-like policy (SRF Operating Agreement). The State has determined that this project is eligible for a categorical exclusion. Accordingly, the State is exempting the project from further substantive environmental review requirements under the above stated policies.

Project Description:

The project consists of pipe replacement, valve replacement, installation of fire hydrants, service line replacement, and replacement of water meters and the associated appurtenances. The project will be funded by a Drinking Water State Revolving Fund loan in the amount of \$100,000 at 1%. The project will increase the user rates by \$2.98 per month.

The project by design would not increase the drinking water demand for the planning area.

Criteria for Granting a Categorical Exclusion under 40 CFR parts 6.107 and 6.505

The action proposed will ensure compliance with current and future water treatment standards. The following criteria condition the allowance of the categorical exclusion for the proposed action:

- Functional replacement of equipment;
- Distribution line replacement;
- Minor upgrades and expansions of existing water systems in communities of 10,000 populations or less (distributions line extensions are not included).

The documentation to support this decision will be on file at the Colorado Department of Public Health and Environment, Water Quality Control Division, in Denver, Colorado and is available for public scrutiny upon request. Comments concerning this decision may be addressed to:
