Cyber Security

Technology solutions that help you take the lead

Istonish partners with SIPA to provide cyber security assessments that evaluate your security environment using a methodical approach. The assessment follows a best practices process to develop a detailed remediation plan for low, medium and high risk areas with, often times, no cost options to lower those risks immediately.

Assessment Includes:

- Network vulnerability scanning
- Environmental assessment and access control
- Physical security evaluation
- Detailed analysis of your network vulnerabilities
- Actionable steps for remediation

HOW TO PARTNER WITH SIPA

Visit SIPA’s website to find the EGE agreement and service request form www.colorado.gov/SIPA

Eligibility

Colorado state and local governments, special districts, K-12 and public universities can work with SIPA.

Get Started

The first step is to complete an Eligible Government Entity (EGE) Agreement.

Request a Service

Request a service through the service request form on the SIPA website.
