There were no responses to the RFP, therefore, Employment Services of Weld County provides the required services needed by eligible youth enrolled in the WIA program. Some of these services may be purchased and examples of purchased services include such things as providing youth with vouchers for transportation (e.g. gas vouchers or bus passes), supportive services (work clothing, day care assistance, etc.), or assistance with tuition for post secondary education. Youth may be referred to other local youth serving agencies for additional assistance as needed based upon the individual youth's circumstances.</p>
