These comments concern the Colorado Code of Regulations No. \_\_\_\_\_

1) Is the regulation required by federal or state law?  Yes  No  Don't know

2) Is the regulation language duplicative, outdated, confusing or inconsistent?  
 Yes or  No

If you responded "yes," provide recommended revisions to make the regulation current, clear and concise:

3) Does the regulation adequately protect the health, safety and welfare of Colorado and its residents? Has the regulation achieved the desired intent or could the purpose be accomplished with less regulation or less impact on business, small business, local government and individuals? If so, how?

4) Is the regulation implemented in an efficient and effective manner, including requirements for the issuance of any permits or licenses?

5) If there is a better, cheaper or faster approach to accomplishing the purpose of the regulation, what is it? For rules promulgated after July 1, 2014, if a cost-benefit analysis was completed, use that information when determining whether the rule should continue in its current form, be revised or be repealed.

**COLORADO**  
Department of Public  
Health & Environment

- 6) Does the regulation have implications for health equity and environmental justice considerations and, if so, how are they being addressed?
