The leading cause of cases appearing on the Detailed Timely Processing of Medical Applicant Redeterminations (backlog) report is "Data Entry Complete".

- If the RRR is started in CBMS, the case must be updated to completion including the update of "Data Entry Complete" to **"Yes"** and **running EDBC**. This is also true if MA Ex Parte is initiated with another HLPG RRR or application.
- Please refer to RRR Process Operational Memo for more information.
